Are We There Yet? Apr 14 2021 Caldecott Medalist Dan Santat--creator of *The Adventures of Beekle: The Unimaginary Friend* and *After the Fall*--takes readers on the road trip of a lifetime! "Are we there yet?" Every parent has heard this classic kid question on a long car ride--and after reading this astonishingly inventive new book (that even turns upside down for several pages!), you'll never look at being bored the same way again. Let's face it: everyone knows that car rides can be boring. And when things get boring, time slows down. In this book, a boy feels time slowing down so much that it starts going backward--into the time of pirates! Of princesses! Of dinosaurs! The boy was just trying to get to his grandmother's birthday party, but instead he's traveling through Ancient Egypt and rubbing shoulders with Ben Franklin. When time flies, who knows where--or when--he'll end up.

An Environmental Study of Artisanal, Small, and Medium Mining in Bolivia, Chile, and Peru Dec 23 2021 "Mining exploration investment in the Latin American and Caribbean region has increased 130 percent in the last five years, a figure which increases to 500 percent, if Chile is excluded." Governments have revamped mining legislation to enable private investment while becoming more sensitive to environmental factors. In light of this legislation, this report examines the environmental effects of artisanal, small, and medium mines in three Latin American Countries: Bolivia, Chile, and Peru. Four of the most important elements to be considered are: □ The age of the mine □ Management of tailings □ The heterogeneity of the artisanal and small mine sectors □ The increasing need to take cultural considerations into account in the decision making process. The paper contains results of the studies on the various mining sectors, strategy and policy recommendations, and country study summaries.

Just Needs a Recharge Nov 29 2019 Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Classic British Motorcycles Mar 02 2020 In the modern era, mass-produced motorcycles tend to be of Japanese or Italian origin with the 'big four' Asian manufacturers dominating the market. However, it wasn't always the case. Until the 1950s, even into the 60s, British makers such as Scott, Rudge, BSA, Norton and Vincent ruled the roost. These legendary companies sold their bikes around the world, winning racing championships and setting speed records as they went. They, and many smaller British firms like them, are motorcycling's founding companies. This is the story of those pioneering firms, whose engineers - many self-taught - were fired by racing ambition, commercial rivalry, patriotic duty, and above all, a passion for innovation. Superbly illustrated with over 150 color pictures many previously unpublished *Classic British Motorcycles* is a captivating and highly

informative account of the men, machines, race meetings and world events that shaped the development of the motorcycle from its bicycle origins.
