The Old Drift Feb 01 2020 On the banks of the Zambezi River, a few miles from the majestic Victoria Falls, there was once a colonial settlement called The Old Drift. Here begins the epic story of a small African nation, told by a mysterious swarm-like chorus that calls itself man's greatest nemesis. The tale? A playful panorama of history, fairytale, romance and science fiction. The moral? To err is human.

The Global History of Paleopathology May 30 2022 The first comprehensive global history of the discipline of paleopathology

Islands in the Sky Jan 14 2021 The technologically groundbreaking novel of space exploration from the only science fiction author nominated for a Nobel Peace Prize. Roy Malcolm has always been fascinated by space travel. And when he wins a voyage to the Inner Space Station as a game show prize, he's sure it's the trip of a lifetime. Before long, Roy is taken in by the young crew—and shares their adventures and lives. One of Arthur C. Clarke's earliest novels, Islands in the Sky is particularly noteworthy for its description of geostationary communications satellites. While this technology was nonexistent during the writing of this book, it later became commonplace—and Clarke is credited with the first practical descriptions of such technology. This book is compelling not just as a fictional tale, but

as an example of the prescient power of Clarke's vision. "[Clarke is] one of the truly prophetic figures of the space age." —The New Yorker

The Challenge of the Sea Aug 28 2019 The author writes of some of the mysteries of the sea that are being questioned by man. He discusses the geology, geography, and history of the oceans. The minerals, foods, and other treasures to be discovered, the cycle of animal, plant, and fish life, method of diving, exploring, the fishing, and some of the vessels used for these purposes are covered.

The Sentinel Jun 26 2019 A collection of short stories by the author of *Childhood's End* and *2001: A Space Odyssey* showcases the author's storytelling skills in such works as "The Sentinel," "Guardian Angel," "The Songs of Distant Earth," and "Breaking Strain." Reprint.

Sunstorm Sep 02 2022 "Clarke and Baxter have mastered the art of saving the world in blockbuster style."—Entertainment Weekly *Returned to the Earth of 2037* by the mysterious and powerful Firstborn, Bisesa Dutt is haunted by memories of her five years spent on the strange alternate Earth called Mir, a jigsaw-puzzle world made up of lands and people cut out of different eras of Earth's history. Why did the Firstborn create Mir? Why was Bisesa taken there and then brought back just a day after her disappearance? Bisesa's questions are answered when scientists discover an unnatural anomaly in the sun's core—evidence of alien intervention more than two thousand years ago. Now plans set in motion by inscrutable observers light-years away are coming to fruition in a sunstorm designed to eradicate all life on Earth in a bombardment of radiation. As the apocalypse looms, religious and political differences on Earth threaten to undermine every countereffort. And all the while, the Firstborn are watching. . . . Praise for Sunstorm "An absolute must for science fiction fans."—All Things Considered, NPR "Enthralling . . . highly satisfying."—The New York Times Book Review "Will keep readers turning pages."—Publishers Weekly

Arthur C. Clarke's Venus Prime Aug 09 2020 Bioengineered super-agent Sparta investigates when Professor J. Q. R. Forster's expedition to one of the moons of Jupiter uncovers an ancient alien world-ship from an unknown civilization that hurtles through space toward a black hole and toward a course that could determine the ultimate fate of Earth. Original.

From Strength to Strength Jul 20 2021 The roadmap for finding purpose, meaning, and success as we age, from bestselling author, Harvard professor, and the Atlantic's happiness columnist Arthur Brooks. Many of us assume that the more successful we are, the less susceptible we become to the sense of professional and social irrelevance that often accompanies aging. But the truth is, the greater our achievements and our attachment to them, the more we notice our decline, and the more painful it is when it occurs. What can we do, starting now, to make our older years a time of happiness, purpose, and yes, success? At the height of his career at the age of 50, Arthur Brooks embarked on a seven-year journey to discover how to transform his future from one of disappointment over waning abilities into an opportunity for progress. *From Strength to Strength* is the result, a practical roadmap for the rest of your life. Drawing on social science, philosophy, biography, theology, and eastern wisdom, as well as dozens of interviews with everyday men and women, Brooks shows us that true life success is well within our reach. By refocusing on certain priorities and habits that anyone can learn,

such as deep wisdom, detachment from empty rewards, connection and service to others, and spiritual progress, we can set ourselves up for increased happiness. Read this book and you, too, can go from strength to strength.

*Richter* 10 Feb 24 2022 Political and environmental disasters come crashing down in this earthquake sci-fi thriller co-written by the authors of *2001: A Space Odyssey* and *Memories*. When he was seven years old, Lewis Crane survived the Los Angeles earthquake of 1994—but his parents did not. Haunted by the tragedy, Crane has dedicated his life to protecting humanity from similar disasters. Now he is a Nobel Prize-winning earthquake scientist who perfected equipment sensitive enough to predict an earthquake strike down to the minute. And he wants to go further. Crane has formed an organization to explore the idea of stopping earthquakes entirely by fusing the Earth's tectonic plates together. But what effect will this have on the earth? And as political unrest causes tremors of another kind, can Crane's audacious plan stop another major earthquake due to hit the United States? Co-written by Hugo and Nebula Award-winning author Arthur C. Clarke and Philip K. Dick Award-winning author Mike McQuay, the "two formidable SF talents converge splendidly in this disaster thriller, which offers sleek action-adventure writing, world-class tumult and a coherent near-future based on sound yet innovative social and scientific speculation" (*Publishers Weekly*).

*Time's Eye* Oct 23 2021 "Wonderfully entertaining . . . a story that engrosses you with its dramatized ideas about the nature of existence . . . You won't set the book down either to eat or sleep or work if you can help it."—*Chicago Tribune* In an instant, Earth is carved up in time and reassembled like a huge jigsaw puzzle. Suddenly the world becomes a patchwork of eras, from prehistory to 2037, each with its own indigenous inhabitants. The explanation for this cataclysmic event may lie in the ancient city of Babylon, where two groups of refugees from 2037—three cosmonauts and three U.N. peacekeepers—have detected strange radio signals. The peacekeepers find allies in nineteenth-century British troops and in the armies of Alexander the Great. The cosmonauts join forces with the Mongol horde led by Genghis Khan. Both sides set out for Babylon, vowing to win the race for knowledge—as a powerful and mysterious entity watches, waiting. Praise for *Time's Eye* "A rousing adventure."—*The New York Times Book Review* "By the end, when two of history's most ambitious conquerors meet, we are so thoroughly invested in the characters, we can't wait for the sequel."—*Entertainment Weekly* (Editor's Choice) "A fast and engaging read."—*Rocky Mountain News*

*The Garden of Rama* Dec 25 2021 In the spellbinding Arthur C. Clarke tradition, here is an exhilarating adventure into the hearts of both the Universe and mankind . . . By the twenty-third century Earth has already had two encounters with massive, mysterious robotic spacecraft from beyond our solar system—the incontestable proof of an alien technology that far exceeds our own. Now three human cosmonauts are trapped aboard a labyrinthine Raman vessel, where it will take all of their physical and mental resources to survive. Only twelve years into their journey do these intrepid travelers learn their destination and face their ultimate challenge: a rendezvous with a Raman base—and the unseen architects of their galactic home. The cosmonauts have given up family, friends, and possessions to live a new kind of life. But the answers that await them at the Raman Node will require an

even greater sacrifice—if humanity is indeed ready to learn the awe-inspiring truth.

Arthur C. Clarke Oct 11 2020 A critical assessment of the novels and short stories of Arthur C. Clarke, presented with a brief biographical sketch, highlights his contributions to science fiction and his impact on literature in general

Arthur C. Clarke's Venus Prime 2-Maelstrom Jun 30 2022 "[A] combination of mystery and science fiction almost reaching the level of Isaac Asimov's classic LIJE BALEY-Daneel Olivaw novels." -CHICAGO SUN TIMES The second volume of the spectacular science fiction thriller evolving from the works of Arthur C. Clarke, the grandmaster of science fiction. Her code name is Sparta, whose beauty veils a mysterious past and abilities of superhuman dimension; the product of advanced biotech engineering. When a team of scientists is trapped in the gaseous inferno of Venus, Sparta must risk her life to save them, unaware that her actions will help recover a mysterious artifact: irrefutable evidence of life on another planet. This new edition contains revised technical drawings and specifications.

Rama Revealed Nov 11 2020 On its mysterious voyage through interstellar space, a massive alien starship carries its human passengers to the end of a generations-long odyssey. But the great experiment designed by the Ramans has failed, and Rama III has become a battleground. Fleeing a tyrant, a band of humans ventures into the nether regions of the ship, where they encounter an emerald-doomed lair ruled by the fabulously advanced octospiders. As the octospiders lure the humans deeper into their domain, the humans must decide whether the creatures are their allies or enemies. All the while, Rama III continues its in-explorably journey towards the node, where the climax of their voyage awaits the stunning revelation of the true identity of the beings behind this glittering trek across the cosmos.

Firstborn Apr 04 2020 The Firstborn—the mysterious race of aliens who first became known to science fiction fans as the builders of the iconic black monolith in 2001: A Space Odyssey—have inhabited legendary master of science fiction Sir Arthur C. Clarke's writing for decades. With Time's Eye and Sunstorm, the first two books in their acclaimed Time Odyssey series, Clarke and his brilliant co-author Stephen Baxter imagined a near-future in which the Firstborn seek to stop the advance of human civilization by employing a

technology indistinguishable from magic. Their first act was the Discontinuity, in which Earth was carved into sections from different eras of history, restitched into a patchwork world, and renamed Mir. Mir's inhabitants included such notables as Alexander the Great, Genghis Khan, and United Nations peacekeeper Bisesa Dutt. For reasons unknown to her, Bisesa entered into communication with an alien artifact of inscrutable purpose and godlike power—a power that eventually returned her to Earth. There, she played an instrumental role in humanity's race against time to stop a doomsday event: a massive solar storm triggered by the alien Firstborn designed to eradicate all life from the planet. That fate was averted at an inconceivable price. Now, twenty-seven years later, the Firstborn are back. This time, they are pulling no punches: They have sent a "quantum bomb." Speeding toward Earth, it is a device that human scientists can barely comprehend, that cannot be stopped or destroyed—and one that will obliterate Earth. Bisesa's desperate quest for answers sends her first to Mars and then to Mir, which is itself threatened with extinction. The end seems inevitable. But as shocking new insights emerge into the nature of the Firstborn and their chilling plans for mankind, an unexpected ally appears from light-years away.

Space Odyssey Jun 06 2020 The definitive story of the making of 2001: A Space Odyssey, acclaimed today as one of the greatest films ever made, and of director Stanley Kubrick and writer Arthur C. Clarke—"a tremendous explication of a tremendous film...Breathtaking" (The Washington Post). Fifty years ago a strikingly original film had its premiere. Still acclaimed as one of the most remarkable and important motion pictures ever made, 2001: A Space Odyssey depicted the first contacts between humanity and extraterrestrial intelligence. The movie was the product of a singular collaboration between Stanley Kubrick and science fiction visionary Arthur C. Clarke. Fresh off the success of his cold war satire Dr. Strangelove, Kubrick wanted to make the first truly first-rate science fiction film. Drawing from Clarke's ideas and with one of the author's short stories as the initial inspiration, their bold vision benefited from pioneering special effects that still look extraordinary today, even in an age of computer-generated images. In Space Odyssey, author, artist, and award-winning filmmaker Michael Benson "delivers expert inside stuff" (San Francisco Chronicle) from his extensive research of Kubrick's and Clarke's archives. He has had the cooperation of Kubrick's widow, Christiane, and interviewed most of the key people still alive who worked on the film. Drawing also from other previously unpublished interviews, Space Odyssey provides a 360-degree view of the film from its genesis to its legacy, including many previously untold stories. And it features dozens of photos from the making of the film, most never previously published. "At last! The dense, intense, detailed, and authoritative saga of the making of the greatest motion picture I've ever seen...Michael Benson has done the Cosmos a great service" (Academy Award-winning actor Tom Hanks).

Rendezvous With Rama Sep 09 2020 During the twenty-second century, a space probe's investigation of a mysterious, cylindrical asteroid brings man into contact with an extra-galactic civilization

Cradle May 06 2020 When the US Navy's new, state-of-the-art missile disappears after its test launch, panic ensues - if it ends up anywhere near

civilians, the consequences could be massive. Where has it gone? What has happened? Seemingly unconnected, journalist Carol Dawson is investigating the unusual sightings of whales in Miami, which may or may not be linked to the missing rocket. Armed with Oceanographic research equipment, Carol charters a boat skippered by Nick Williams and Jefferson Troy and heads to the Gulf of Mexico. What they find can barely be explained but could be worth untold riches. While Carol, Nick and Jefferson attempt to uncover the origin of the mysterious artefact they have discovered, they must dodge treasure hunters, the government, and consider the origin of humanity itself. Is this the First Contact? Or is it the last?

Arthur C. Clarke Mar 28 2022 Already renowned for his science fiction and scientific nonfiction, Arthur C. Clarke became the world's most famous science fiction writer after the success of *2001: A Space Odyssey*. He then produced novels like *Rendezvous with Rama* and *The Fountains of Paradise* that many regard as his finest works. Gary Westfahl closely examines Clarke's remarkable career, ranging from his forgotten juvenilia to the passages he completed for a final novel, *The Last Theorem*. As Westfahl explains, Clarke's science fiction offered original perspectives on subjects like new inventions, space travel, humanity's destiny, alien encounters, the undersea world, and religion. While not inclined to mysticism, Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans. Westfahl also contradicts the common perception that Clarke's characters were bland and underdeveloped, arguing that these reticent, solitary individuals, who avoid conventional relationships, represent his most significant prediction of the future, as they embody the increasingly common lifestyle of people in the twenty-first century.

Love Your Enemies Jul 08 2020 NATIONAL BESTSELLER To get ahead today, you have to be a jerk, right? Divisive politicians. Screaming heads on television. Angry campus activists. Twitter trolls. Today in America, there is an "outrage industrial complex" that prospers by setting American against American, creating a "culture of contempt"—the habit of seeing people who disagree with us not as merely incorrect, but as worthless and defective. Maybe, like more than nine out of ten Americans, you dislike it. But hey, either you play along, or you'll be left behind, right? Wrong. In *Love Your Enemies*, social scientist and author of the #1 New York Times bestseller *From Strength to Strength* Arthur C. Brooks shows that abuse and outrage are not the right formula for lasting success. Brooks blends cutting-edge behavioral research, ancient wisdom, and a decade of experience leading one of America's top policy think tanks in a work that offers a better way to lead based on bridging divides and mending relationships. Brooks' prescriptions are unconventional. To bring America together, we shouldn't try to agree more. There is no need for mushy moderation, because disagreement is the secret to excellence. Civility and tolerance shouldn't be our goals, because they are hopelessly low standards. And our feelings toward our foes are irrelevant; what matters is how we choose to act. *Love Your Enemies* offers a clear strategy for victory for a new generation of leaders. It is a rallying cry for people hoping for a new era of American progress. Most of all, it is a roadmap to arrive at the happiness that comes when we choose to love one another, despite our differences.

*Childhood's End* Jan 26 2022 In the Retro Hugo Award-nominated novel that inspired the Syfy miniseries, alien invaders bring peace to Earth—at a grave price: “A first-rate tour de force” (The New York Times). In the near future, enormous silver spaceships appear without warning over mankind’s largest cities. They belong to the Overlords, an alien race far superior to humanity in technological development. Their purpose is to dominate Earth. Their demands, however, are surprisingly benevolent: end war, poverty, and cruelty. Their presence, rather than signaling the end of humanity, ushers in a golden age . . . or so it seems. Without conflict, human culture and progress stagnate. As the years pass, it becomes clear that the Overlords have a hidden agenda for the evolution of the human race that may not be as benevolent as it seems. “Frighteningly logical, believable, and grimly prophetic . . . Clarke is a master.” —Los Angeles Times

Arthur C. Clarke Sep 21 2021 Portrays the life and career of Arthur C. Clarke, including interviews with friends and colleagues and highlighting his contributions to science fiction

3001 Oct 03 2022 The mysteries of the monoliths are revealed in this inspired conclusion to the Hugo Award-winning *Space Odyssey* series—“there are marvels aplenty” (The New York Times). On an ill-fated mission to Jupiter in 2001, the mutinous supercomputer HAL sent crewmembers David Bowman and Frank Poole into the frozen void of space. Bowman’s strange transformation into a Star Child is traced through the novels 2010 and 2061. But now, a thousand years after his death, Frank Poole is brought back to life—and thrust into a world far more technically advanced than the one he left behind. Poole discovers a world of human minds interfacing directly with computers, genetically engineered dinosaur servants, and massive space elevators built around the equator. He also discovers an impending threat to humanity lurking within the enigmatic monoliths. To fight it, Poole must join forces with Bowman and HAL, now fused into one corporeal consciousness—and the only being with the power to thwart the monoliths’ mysterious creators. “3001 is not just a page-turner, plugged in to the great icons of HAL and the monoliths, but a book of wisdom too, pithy and provocative.” —New Scientist

Arthur C. Clarke's July 20, 2019 Apr 16 2021 A science fiction writer offers a glimpse of life in the twenty-first century with a visit to a law office run by computer, to baseball pitchers with bionic implants throwing 120-mph fastballs

Sermons of Arthur C. McGill Aug 21 2021 Throughout the 1960s and 1970s, Arthur McGill had numerous opportunities to air his rich theological musings outside of the classroom. We are now fortunate, some twenty-five years after his death, to have seventeen sermons brought to us by the aid of his wife Lucille McGill and editor David Cain (University of Mary Washington). These homilies reveal the core themes that distinguish his theological writings: relaxing in our neediness before God, participating in the death-to-life pattern of self-expenditure, and rooting our hope in the unique power of Christ. The collection culminates with what Cain notes as McGill's signature sermon on *The Good Samaritan*, wherein we see that the reception of grace always precedes the extension of grace. In addressing day-to-day issues such as possessions, speech, loneliness, and anger, McGill is both prophetic and pastoral. He does not hesitate to say that the wickedness of

Nineveh--alas!--is the wickedness of the United States. At the same time, he brings a refreshing word with theological depth about human suffering and the God who models ultimate vulnerability. This book is *Theological Fascinations, Volume One*, marking the hope that further volumes might emerge from the papers of Arthur C. McGill, evidencing the richness of his theological fascinations.

2010 Aug 01 2022 To the spaceship *Discovery*, floating in the silent depths of space since Dave Bowman passed through the alien 'Star Gate', comes Heywood Floyd on a mission of recovery. What he finds near Jupiter is beyond the imaginings of any mere human.

Arthur C. Clarke's *Mysterious World* Sep 29 2019

*The Songs of Distant Earth* Jan 02 2020 Earth refugees threaten a peaceful space settlement in this influential novel from the Golden Age science fiction author of *2001: A Space Odyssey*. More than two thousand years in the future, a small human colony thrives on the ocean paradise of *Thalassa*—sent there centuries ago to continue the human race before Earth's destruction. *Thalassa's* resources are vast—and the human colony has lived a bucolic life there. But their existence is threatened when the spaceship *Magellan* arrives on their world—carrying one million refugees from Earth, fleeing the dying planet. Reputed to be Arthur C. Clarke's favorite novel, *The Songs of Distant Earth* addresses several fascinating scientific questions unresolved in their time—including the question of why so few neutrinos from the sun have been measured on Earth. In addition, Clarke presents an inventive depiction of the use of vacuum energy to power spacecraft—and the technical logistics of space travel near the speed of light. "Clarke's simple, musical style never falters in this sobering yet far from bleak commentary on humanity's longing for the stars. Highly recommended." —*Library Journal*

*The Collected Stories of Arthur C. Clarke* Nov 04 2022 Introduces readers to the author's shorter works, spanning his entire writing career, including "The Nine Billion Names of God," "Nemesis," "The Sentinel," and "The Songs of Distant Earth."

*The Great Science Fiction Stories* Dec 01 2019

*The Space Trilogy* Jul 28 2019 The omnibus edition of three classic and inspirational Clarke tales *ISLANDS IN THE SKY*, first published in 1954, sees Roy Malcolm winning a trip to the Inner Station, a space station rotating 500 miles from Earth. *THE SANDS OF MARS*, set in the 21st century, has a group of pioneers struggling to change the face of this inhospitable planet. In *EARTHLIGHT*, two centuries hence, man has colonised the planets and the inhabitants of the Moon owe no allegiance to any nation on Earth - or to Earth itself ... This omnibus edition of three of Arthur C. Clarke's early novels shows the author of *2001: A SPACE ODYSSEY* exploring space and time in adventurous and thoughtful ways.

Arthur C. Clarke's *Venus Prime* 3 Feb 12 2021 "[A] combination of mystery and science fiction almost reaching the level of Isaac Asimov's classic *LIJE BALEY*—Daneel Olivaw novels." —*CHICAGO SUN TIMES* The third volume in a series of science-fiction thrillers evolving from the works of Arthur C. Clarke, grandmaster of science fiction and author of *2001: A SPACE ODYSSEY*. Her code name is Sparta. Her beauty veils a mysterious past and abilities far surpassing those of a normal human—the first product of advanced biotech engineering. At long last, evidence of extraterrestrial life has been found:

a plaque discovered on the edge of the north polar icecap on Mars. And when the theft of that alien artifact leads to two murders in the Labyrinth City, Sparta must risk her life and her identity to solve the case. As the mystery unravels, the investigation becomes a race across the stars to retrieve the plaque, a quest which will ultimately uncover even more evidence than Earth's scientists have ever discovered!

Rama II Apr 28 2022 In the sequel to "Rendezvous with Rama," a second Raman spacecraft is discovered approaching Earth in 2196, an event of potentially devastating consequences for humankind

Earthlight May 18 2021 This "marvelous lunar espionage thriller" by the science fiction grandmaster and author of 2001: A Space Odyssey "packs plenty of punch" (SFReviews.net). Two hundred years after landing on the Moon, mankind has moved further out into the solar system. With permanent settlements now established on the Moon, Venus, and Mars, the inhabitants of these colonies have formed a political alliance called the Federation. On the Moon, a government agent from Earth is tracking a suspected spy at a prominent observatory. His mission is complicated by the rise in tensions between Earth's government and the Federation over access to rare heavy metals. As the agent finds himself locked in a battle for life and death on the eerie, lunar landscape, the larger conflict explodes across space, leaving mankind's future in doubt. First published in 1955, this suspense-filled space opera by the Science Fiction and Fantasy Hall of Fame inductee was a significant forerunner of television hits like Star Trek and The Expanse.
