Healers in World War II Sep 26 2019 Dr. Logan W. Hovis parachuted onto Corregidor with the 503rd Regimental Combat Team. Dr. Jeremiah Henry Holleman served with the 89th Division all the way into Germany, liberating a concentration camp. Nurse Mary A. Breeding, five feet tall, 100 pounds, served with the 174th General Hospital in France. Dr. Vincent Stephen Conti was awarded a Bronze Star for fighting typhus in Naples, Italy. These accounts and 31 others covering the heroics of 44 individuals working in the Medical Corps are gathered here by editor Patricia W. Sewell. Firsthand accounts are given by doctors, nurses, ambulance drivers, front-line medics, Navy corpsmen, medical personnel who served on air evacuation teams and hospital ships, and others who functioned in many different capacities. Autobiographies, interviews, letters and cassette tapes helped compose most of these narratives.

The Spectrum of Family Caregiving for Adults and Elders with Chronic Illness Jun 27 2022 The vast majority of care provided to adults and elders with chronic illness is given in the home, most often by family members. The caregiver's role is daunting; caregiving is often referred to as a 'career,' requiring long hours and arduous tasks. Primary caregivers show higher rates of morbidity and mortality, and caregiving is a major source of stress and burden to caregiving families. Presently, very little support is available to caregivers from either State or Federal agencies. However, awareness of this worsening problem is growing among health professionals and policy makers. *The Spectrum of Family Caregiving for Adults and Elders with Chronic Illness* is written for individuals in the helping professions who are in roles that interface with or serve family caregivers who are supporting an adult or elder with a chronic condition. The volume includes eight disease-specific chapters written by experts from various disciplines. Each discusses the caregiving role and includes a thorough review of the literature on the

characteristics of caregivers and care-recipients, including related care needs, issues, and challenges unique to that chronic illness. Chapters also review the extant literature on caregiver interventions. An Evidence Table is included in each of these chapters so that the reader can easily judge the quality of evidence supporting the intervention studies. Finally, each chapter includes two case studies describing common problems encountered by caregivers, along with descriptions of interventions used to address these problems. The final chapter summarizes the state of the science on caregiving roles and caregiver interventions and discusses the most relevant challenges and barriers faced by today's caregivers and caregiver advocates. This book will be valuable to clinicians and those in the helping professions, as well as academics and researchers with an interest in the study of family caregiving and caregiver interventions, and to health administrators, public officials, and policy makers concerned with chronic illness care and management.

Always On Aug 06 2020 'Delightfully insightful and intensely readable [...] There is an energy and drama to Rory's writing which nonetheless leaves space for us, the reader, to make up our minds' – Stephen Fry We live at a time when billions have access to unbelievably powerful technology. The most extraordinary tool that has been invented in the last century, the smartphone, is forcing radical changes in the way we live and work - and unlike previous technologies it is in the hands of just about everyone. Coupled with the rise of social media, this has ushered in a new era of deeply personal technology, where individuals now have the ability to work, create and communicate on their own terms, rather than wait for permission from giant corporations or governments. At least that is the optimistic view. This book takes readers on a hectic ride through this turbulent era, as related by an author with a ringside seat to the key moments of the technology revolution. We remember the excitement and wonder that came with the arrival of Apple's iPhone with all the promise it offered. We see tech empires rise and fall as these devices send shockwaves through every industry and leave the corporate titans of the analogue era floundering in their wake. We see that early utopianism about the potential of the mobile social revolution to transform society for the better fade, as criminals, bullies and predators poison the well of social media. And we hear from those at the forefront of the tech revolution, including Stephen Hawking, Elon Musk, Tim Berners-Lee, Martha Lane-Fox and Jimmy Wales, to gain their unique insights and predictions for what may be to come. **Always On** immerses the reader in the most important story of our times – the dramatic impact of hyperconnectivity, the smartphone and social media on everything from our democracy to our employment and our health. The final section of the book draws on the author's own personal experience with technology and medicine, considering how COVID-19 made us look again to computing in our battle to confront the greatest challenge of modern times.

Now, with Matty just weeks away from taking up his place at a prestigious London dance academy, Noah is desperate to make the most of the little time they have left. It's only a temporary separation, and they are forever. Or so he'd thought.

Perfidia Mar 13 2021 NATIONAL BESTSELLER AN NPR BEST BOOK OF THE YEAR It is December 6, 1941. America stands at the brink of World War II. Last hopes for peace are shattered when Japanese squadrons bomb Pearl Harbor. Los Angeles has been a haven for loyal Japanese-Americans—but now, war fever and race hate grip the city and the Japanese internment begins. The hellish murder of a Japanese family summons three men and one woman. William H. Parker is a captain on the Los Angeles Police Department. He's superbly gifted, corrosively ambitious, liquored-up, and consumed by dubious ideology. He is bitterly at odds with Sergeant Dudley Smith—Irish émigré, ex-IRA killer, fledgling war profiteer. Hideo Ashida is a police chemist and the only Japanese on the L.A. cop payroll. Kay Lake is a twenty-one-year-old dilettante looking for adventure. The investigation throws them together and rips them apart. The crime becomes a political storm center that brilliantly illuminates these four driven souls—comrades, rivals, lovers, history's pawns. *Perfidia* is a novel of astonishments. It

is World War II as you have never seen it, and Los Angeles as James Ellroy has never written it before. Here, he gives us the party at the edge of the abyss and the precipice of America's ascendance. Perfidia is that moment, spellbindingly captured. It beckons us to solve a great crime that, in its turn, explicates the crime of war itself. It is a great American novel.

The Girl, the Gold Watch & Everything Feb 09 2021 From John D. MacDonald, one of the enduring American novelists of the twentieth century, comes a science fiction classic with a timeless premise. An aimless young man discovers a way to stop the world in its tracks—and that's when his life truly begins. Introduction by Dean Koontz Once an ordinary math teacher, Omar Krepps developed a knack for gambling, amassed a fabulous fortune, and spent the rest of his life traveling the world and giving away his millions. Upon his death, however, Krepps bequeaths nothing to his nephew and only living blood relative, Kirby Winter—nothing, that is, except an antique watch and a sealed letter to be opened after one year. But Kirby has much more in his possession than he realizes. The watch has the power to manipulate time. Not only does this revelation shed light on the mystery of his uncle's life, it puts Kirby on the path to unimaginable wealth and a new lease on love . . . as well as a whole host of deadly troubles. Even in a universe where time is no issue, Kirby must tread carefully to stay one step ahead of danger. Praise for John D. MacDonald "To diggers a thousand years from now, the works of John D. MacDonald would be a treasure on the

order of the tomb of Tutankhamen.”—Kurt Vonnegut “As a young writer, all I ever wanted was to touch readers as powerfully as John D. MacDonald touched me.”—Dean Koontz “John D. MacDonald was a writer way ahead of his time.”—John Saul

The Opposite of Dark Oct 20 2021 Thirty-year-old Casey Holland likes being a transit security cop. It brings out the best of her compassion, perseverance and courage. After capturing a suspect who’s been groping female bus passengers, Casey learns that her father was murdered in his West Vancouver home the previous evening. The trouble is, Casey buried her dad at an open-casket funeral service three years earlier, and he never owned a house in pricey West Van. Convinced that the police are mistaken, Casey accompanies them to the morgue. When she sees the body, her certainty dissolves. Against her better judgment and the wishes of the investigating detective, Casey starts asking questions about her father and the strange house in West Van, placing her life, and her friends’ lives, in jeopardy. Her search for answers takes her to England, Europe and Vancouver Island, and Casey uncovers a scheme her father was involved in that may have led to his death—which death, though, is still unclear. One thing is certain: Casey’s life is in danger.

Modernizing VATs in Africa Nov 20 2021 Most African countries are in dire need of more tax revenue. In 28 out of 45 countries with a value-added tax (VAT), total tax revenue as a percentage of GDP is around 15% or less, falling short of what is necessary to finance basic human and economic development. Far from being revenue-raising instruments, current African VATs are riddled with exemptions, exclusions, and zero rates on domestic goods and services that depress revenue, are highly distortionary, and greatly complicate the administration of VAT. *Modernizing VATs in Africa* enables policymakers, professionals, and students to analyse African tax systems to ascertain how they can be modernized. It explains the case for VAT base-broadening over rate-increasing, arguing that exemptions and zero rates mainly accrue benefits for higher-income groups. Even more persuasively, it demonstrates that the net result of fiscal systems can be equalizing if the revenue of broad-based VATs is used to finance in-kind transfers, such as healthcare and education. VAT modernization should be used to enable governments to finance development; *Modernizing VATs in Africa* puts a compelling case forward for how and why this can be achieved.
