Connections Oct 09 2020 *Connections: A World History* focuses on the connections within and between societies, combining a uniquely comprehensive and consistent map program with a strong pedagogical support and a narrative that students will actually read. Written by historians with years of experience teaching world history, *Connections* presents both a global and regional perspective, so students can appreciate both the diversity and connectedness of human societies. Concise chapters and a clear engaging narrative make the text accessible to a wide range of students. In addition, because students struggle with geography, the book includes significantly more maps than other texts—in most cases twice as many—and great care was taken to make them consistent and exceptionally clear. In each caption, the authors have provided guidance for reading the map and for connecting it to the surrounding text. To further help students succeed, marginal notes highlight major connections for easy review, and pronunciation guides appear after difficult names. Lastly, compelling vignettes introduce the themes of each chapter, concise excerpts from relevant primary sources allow students to hear the voices of the past, and an extensive chapter review section is designed to help students test themselves and succeed in this difficult course.

Getting the message through: A Branch History of the U.S. Army Signal Corps Jul 06 2020 *Getting the Message Through*, the companion volume to Rebecca Robbins Raines' *Signal Corps*, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and

change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be *sine qua non* to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

The Atlantic Connection Dec 23 2021 Focusing on the interconnections of the Atlantic world from 1450-1900, The Atlantic Connection examines the major themes of Atlantic history. During this period, ships, goods, diseases, human beings and ideas flowed across the ocean, tying together the Atlantic basin in a complex web of relationships. Divided into five main thematic sections while maintaining a broadly chronological structure, this book considers key cultural themes such as gender, social developments, the economy, and ideologies as well as: - the role of the Atlantic in ensuring European dominance - the creation of a set of societies with new cultural norms and philosophical ideals that continued to evolve and to transform not only the Atlantic, but the rest of the world - the contestation over rights and justice that emerged from the Atlantic world which continues to exist as a significant issue today. The Atlantic Connection is shaped by its exploration of a key question: how did Europe come to dominate the Atlantic if not through its technological prowess? Adeptly weaving a multitude of events into a larger analytical narrative, this book provides a fascinating insight into this complex region and will be essential reading for students of Atlantic history.

Knowledge and Power Jan 24 2022 Knowledge and Power presents and explores science not as something specifically for scientists, but as an integral part of human civilization, and traces the development of science through different historical settings from the Middle Ages through to the Cold War. Five case studies are examined within this book: the creation of modern science by Muslims, Christians and Jews in the medieval Mediterranean; the global science of the Jesuit order in the early modern world; the relationship between "modernization" and "westernization" in Russia and Japan from the late seventeenth to the mid-nineteenth century; the role of science in the European colonization of Africa; and the rivalry in "big science" between the United States and the Soviet Union during the Cold War. Each chapter includes original documents to further the reader's understanding, and this second edition has been enhanced with a selection of new images and a new chapter on Big Science and the Superpowers during the Cold War. Since the Middle Ages, people have been working in many civilizations and cultures to advance knowledge of, and power over, the natural world. Through a combination of narrative and primary sources, Knowledge and Power provides students with an understanding of how different cultures throughout time and across the globe approached science. It is ideal for students of world history and the history of science.

Why American History Is Not What They Say Sep 07 2020

Where the Crawdads Sing (Movie Tie-In) May 04 2020 NOW A MAJOR MOTION PICTURE The #1 New York Times bestselling worldwide sensation with more than 15 million copies sold, "a painfully beautiful first novel that is at once a murder mystery, a coming-of-age narrative and a celebration of nature" (The New York Times Book Review). For years, rumors of the "Marsh Girl" have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. *Where the Crawdads Sing* is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Delia Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps.

India and the World Nov 21 2021 In this pioneering history of modern India, Claude Markovits offers a new interpretation of events of world importance, focusing on the multiplicity of connections between India and the world. Beginning with an examination of India's evolving role in the world economy, he deals successively with the movement of people out of and into India, the role played by Indian soldiers in a series of conflicts from the mid-eighteenth to the late twentieth century, the place of India in the global circulation of ideas and cultural productions and the relationships established between Indians and others both abroad and at home. Challenging dominant state-centred histories by focusing on the lived experiences of people, Markovits demonstrates that the multiple connections established between India and other lands did not necessarily result in mutual knowledge, but were often marked by misunderstanding.

A Concise History of the World Jan 12 2021 This book tells the story of humankind as producers and reproducers from the Paleolithic to the present. Renowned social and cultural historian Merry Wiesner-Hanks brings a new perspective to world history by examining social and cultural developments across the globe, including families and kin groups, social and gender hierarchies, sexuality, race and ethnicity, labor, religion, consumption, and material culture. She examines how these structures and activities changed over time through local processes and interactions with other cultures, highlighting key developments that defined particular eras such as the growth of cities or the creation of a global trading network. Incorporating foragers, farmers and factory workers along with shamans, scribes and secretaries, the book widens and lengthens human history. It makes comparisons and generalizations, but also notes diversities and particularities, as it examines the social and cultural matters that are at the heart of big questions in world history today.

Primary History Kingdom of Benin Jul 26 2019 Primary History Kingdom of Benin (Not to be confused with former Dahomey) has been written to support teachers to meet the requirements of the new National Curriculum Framework for history at Key Stage 2: a non-European society that provides contrasts with British history. It covers all historical aspects of the great kingdom which was at its height between the 14th and 16 centuries. This book is divided into three sections. The first section covers study of palace life; the second section covers growing up experiences of the kingdom's children and of ordinary people. The third section provides numerous and varied historical enquiries activities to improve pupils' knowledge and understanding of historical facts of the great kingdom and help to develop their enquiries skills. This section includes comparison of medieval British and Benin kings. This book incorporates historical sources including African oral traditions of storytelling, wood and terracotta sculptures and reading and analysis of the Benin bronze plaques through which the kings and elders of the kingdom chose to record their history. To keep up with technological advancement and opportunities, a dedicated website has been set up to provide further activities and up to date knowledge and information on the kingdom. A virtual classroom has also been created through which the author can clarify and provide additional support to teachers and pupils as necessary. Details of these websites are below. There are many more resources on the website including videos and photographs with cross curricular activities including ideas for developing writing and word work through drama and role play. This method of learning makes this unit an exciting topic for pupils to study. The kingdom, founded around 40Bc was at its height between the 14th and 16th century when it conquered neighbouring countries on the West African Coast and traded far afield with Europeans and traders from the East. It was sacked by the British in 1897 though the crown was restored in 1914, the king's authority and influence was highly diminished. However, the people's traditions and customs continue to this day.
