They are used for diseases prevention and protection especially in this period. Making your own bleach and unscented disinfecting spray and wipe can be super easy if you

follow the directions and instructions in this book. Of course, if you want to make a disinfectant with alcohol, i.e. alcoholic based, it is already made easy and available in this book. These disinfectants can also serve as cleaning wipes that kills germs thereby making you to prevent diseases and to be germ free. The surfaces to clean and disinfect rooms or places inclusive such as, bathroom, floor, kitchen, toilet and other multi-surface are well explained in this book. The type of paper for the wipes and its alternatives were also discussed in this book. Hand sanitizers are useful especially when you don't have access to soap and running water. The sanitizer recipes and ingredients listed in this book manual such as aloe Vera in gel form, with fragrance, and with natural essential oils are very cheap to obtain. This promotes better health and well being. Facemasks are used to cover mouth and nose; the facial part of our body. Hence, we need to purchase them and have them handy. However, the ready made face masks displayed for sale are expensive and difficult to buy due to the prevalent health challenges. In other words, most of them are already sold out. Therefore, we need to learn how to make masks at home and we need to wear them while outside in order to stay safe and healthy. You do not need to worry; this book is a user guide. This guide will definitely teach you how to make breathable face mask so there won't be any need to buy one. It has pictorial illustrations on different directions and patterns of face masks.
