Fundamentals of Federal Income Tax Law Jun 26 2019

Fundamentals of Taxation in Cameroon Oct 30 2019 This book was motivated by his realisation that, in Cameroon, there was a dire scarcity of academic literature on business and management related courses, especially in taxation and tax accounting. The institution of the revised OHADA Act on Accounting and Financial Reporting, beginning 1st January 2018 and the significant changes noticed in the Cameroon finance law of 2018, led to the review of the second edition just over one year after its publication. We refer students, lecturers, scholars, researchers and tax practitioners always to consider the latest provisions in the tax law, which are the General Tax Code and Finance Law reviewed yearly by the Government of Cameroon. The Code used in this edition is in the 2018 but may not be up to date over time. One has, therefore, to check the latest edition of the Code and the most recent law (Finance Law) in operation which generally changes some aspects of the Code or buy the new versions of this book, which is being reviewed every two years. To make certain aspects of the law clear, the Director of Taxes issues interpretation and practice notes which explain what

the contentious sections meant, and how they should be applied. A serious scholar should have all these documents handy. However, any change in the laws does not make the principles and concepts of taxation obsolete. This book is still useful after any review of the law. A chapter on the Theory of Tax has been included in order to give the theoretical understanding of tax. Taxation Theory helps the reader to understand the philosophical basis of taxation. The theory explains why taxes exist and why they are both essential and also detested by the taxpayers. We have provided several illustrations for the computation of various taxes and their accounting treatment. The exercises included at the end of every chapter are for helping the reader test whether he or she has grasped the subject matter. We have worked out some problems for illustration to show the method used in working out the solutions. Readers of this 3rd edition of "Fundamentals of Taxation" will find questions and examples concord with the 2018 Finance Law and the General Tax Code. Many more questions have been added at the end of chapters. We have equally brought in two new chapters (Chapter thirty-two and Chapter thirty-three) in accordance with the new law including an electronic declaration of monthly income tax, amongst others) This book, though useful to the general reader, is aimed at academics - students, lecturers, practising tax consultants and researchers. We hope that this book will fill the gap in the academic literature on taxation and tax accounting in Cameroon.
