Maggie for Hire Mar 04 2020 When monsters appear on Earth, Maggie MacKay is on the job. No one is better at hauling the creepy crawlies back where they belong. No one, that is, except Maggie's dad, who vanished in the middle of an assignment. Now, an elf named Killian has shown up with a gig. Seems Maggie's uncle teamed up with the forces of dark to turn Earth into a vampire convenience store, serving bottomless refills on humans. Ah, family... The only hope for survival lies in tracking down two magical artifacts and a secret that disappeared with Maggie's dad. WARNING: This book contains cussing, brawling, and unladylike behavior. Junctionless Field-Effect Transistors Aug 21 2021 A comprehensive one-volume reference on current JLFET methods, techniques, and research Advancements in transistor technology have driven the modern smart-device revolution—many cell phones, watches, home appliances, and numerous other devices of everyday usage now surpass the performance of the room-filling supercomputers of the past. Electronic devices are continuing to become more mobile, powerful, and versatile in this era of internet-of-things (IoT) due in large part to the scaling of metal-oxide semiconductor field-effect transistors (MOSFETs). Incessant scaling of the conventional MOSFETs to cater to consumer needs without incurring performance

degradation requires costly and complex fabrication process owing to the presence of metallurgical junctions. Unlike conventional MOSFETs, junctionless field-effect transistors (JLFETs) contain no metallurgical junctions, so they are simpler to process and less costly to manufacture.JLFETs utilize a gated semiconductor film to control its resistance and the current flowing through it. Junctionless Field-Effect Transistors: Design, Modeling, and Simulation is an inclusive, one-stop referenceon the study and research on JLFETs This timely book covers the fundamental physics underlying JLFET operation, emerging architectures, modeling and simulation methods, comparative analyses of JLFET performance metrics, and several other interesting facts related to JLFETs. A calibrated simulation framework, including guidance on SentaurusTCAD software, enables researchers to investigate JLFETs, develop new architectures, and improve performance. This valuable resource: Addresses the design and architecture challenges faced by JLFET as a replacement for MOSFET Examines various approaches for analytical and compact modeling of JLFETs in circuit design and simulation Explains how to use Technology Computer-Aided Design software (TCAD) to produce numerical simulations of JLFETs Suggests research directions and potential applications of JLFETs Junctionless Field-Effect Transistors: Design, Modeling, and Simulation is an essential resource for CMOS device design researchers and advanced students in the field of physics and semiconductor devices.

Guidelines on Firewalls and Firewall Policy Dec 01 2019 This document provides guidelines for Federal organizations acquisition and use of security-related Information Technology (IT) products. These guidelines provide advice to agencies for sensitive (i.e., non-national security) unclassified systems. NIST's advice is given in the context of larger recommendations regarding computer systems security.

Health Promotion Practice: Building Empowered Communities Oct 11 2020 "The book provides an excellent combination of broad theoretical background with a generous helping of vocational guidance on the practice of health promotion." scotregen "A very welcome addition to the practical side of health promotion! Laverackâ€™s brief and simply-worded text weaves together just the right balance of theory, evidence, tips and case studies to satisfy the new learner looking to gain a grasp of health promotionâ€™s empowering whole, while still offering new insights to the more seasoned practitioner." Ronald LabontÃ©, Institute of Population Health, University of Ottawa How can health promotion practitioners help communities to become more empowered? How do you encourage different communities to work together towards a shared goal? How can you focus your resources to be most effective in building empowered communities? How do you evaluate your success (and failures) in building empowered communities? Power and empowerment are two complex concepts that are central to health promotion practice. People experience empowerment in many different ways and this book explains an approach that has been used by health promoters to intentionally build and evaluate empowerment. The book provides a special focus on communities and is illustrated throughout with useful field experiences in the United Kingdom, Asia, North America, the Pacific region and Africa. The book aims to provide the reader with: An understanding of the key concepts of power and empowerment and the link to improved health outcomes in the context of health promotion programmes An understanding of practical approaches that can be used in health promotion programming to build and evaluate empowered communities Case study examples of how communities can be empowered in practice This unique book offers sound theoretical principles to underpin the practical approaches used to build empowered communities and brings together new and innovative approaches in health promotion practice. Health Promotion Practiceis essential reading for health promotion students and practitioners who want to learn more about innovative approaches to build empowered communities in their everyday work. It will inspire them to work in more empowering ways in health promotion practice and to carefully contemplate how they can influence the way others gain power.

High-speed Serial Buses in Embedded Systems May 18 2021 This book describes the most frequently used high-speed serial buses in embedded systems, especially those used by FPGAs. These buses employ SerDes, JESD204, SRIO, PCIE, Aurora and SATA protocols for chip-to-chip and board-

to-board communication, and CPCIE, VPX, FC and Infiniband protocols for inter-chassis communication. For each type, the book provides the bus history and version info, while also assessing its advantages and limitations. Furthermore, it offers a detailed guide to implementing these buses in FPGA design, from the physical layer and link synchronization to the frame format and application command. Given its scope, the book offers a valuable resource for researchers, R&D engineers and graduate students in computer science or electronics who wish to learn the protocol principles, structures and applications of high-speed serial buses.

Hate Speech and Polarization in Participatory Society Mar 16 2021 This timely volume offers a comprehensive and rigorous overview of the role of communication in the construction of hate speech and polarization in the online and offline arena. Delving into the meanings, implications, contexts and effects of extreme speech and gated communities in the media landscape, the chapters analyse misleading metaphors and rhetoric via focused case studies to understand how we can overcome the risks and threats stemming from the past decade's defining communicative phenomena. The book brings together an international team of experts, enabling a broad, multidisciplinary approach that examines hate speech, dislike, polarization and enclave deliberation as cross axes that influence offline and digital conversations. The diverse case studies herein offer insights into international news media, television drama and social media in a range of contexts, suggesting an academic frame of reference for examining this emerging phenomenon within the field of communication studies. Offering thoughtful and much-needed analysis, this collection will be of great interest to scholars and students working in communication studies, media studies, journalism, sociology, political science, political communication and cultural industries.

Kill the Company Jun 30 2022 In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.

Half Portions Dec 13 2020 The short stories in this collection take the reader from small-town Wisconsin to the bustling streets of New York and Chicago and back again. While they range greatly in length and tone, they all share the trademark wit and affectionate insight of Edna Ferber. Showcasing the facility with words that made her a mainstay at the Algonquin round table, Ferber explores some of her favorite themes: the role of women (especially strong or unconventional women) in modern society, the mores of the midwestern small town, and the changes over time in relationships between parents and children. In "The Maternal Feminine," a plain, overlooked child grows into a strong, resourceful businesswoman and forms a strong motherly bond with the children of her more attractive sister. In "April 25th, As Usual," an aging Wisconsin couple reluctantly join their successful daughter in New York, where they try to adjust to a very different lifestyle. "Old Lady Mandle" is a bittersweet tale about an elderly Chicago mother coming to terms with the fact that she is no longer the most important woman in the life of her grown son. "One Hundred Per Cent" features Ferber's celebrated heroine Emma McChesney, now re-married, seeing her husband off to war. The stories gathered here are beautifully

observed chronicles of early twentieth-century life and are filled with characters who, despite their very human foibles, are all bestowed by Ferber with warmth and dignity. "All these stories and all these pages are thronged with real men and women, and in them Miss Ferber continues to display not merely her skill at storytelling, but also her greater skill at breathing into them the breath of life." -- Boston Transcript

The Grace Walk Experience Oct 23 2021 For years, Steve McVey's Grace Walk (more than 200,000 copies sold) has inspired Christians to leave behind a performance and fear-based faith to embrace a faith lived in abundance and grace. Now The Grace Walk Experience workbook helps readers move that message of hope from their heads to their hearts as they explore eight truths that have changed lives worldwide daily, interactive studies that reveal grace as much more than a doctrine ways to quit "doing" for God so that He can live through them illustrations of the wonder and miracle of faith as God intended God's Word, salvation, and evangelism with new perspective This excellent tool for church classes, small group discussion, and individual study will lead believers to understand their identity in Christ, let go of legalism, and make room for the overflowing love, mercy, and purpose of life lived wholly in God's grace.

All The Kids Love That Scary Stuff Aug 09 2020 Amazon readers are praising ALL THE KIDS LOVE THAT SCARY STUFF: "It's a rare work..." "... a delightfully spooky tale..." "Thoroughly enjoyable from beginning to end." "...could visualize each character and every scene..." "Like a spooky tale told around a camp fire." "...an exciting fast read!" Now, you can join the excitement. Order all the adventure, fun, and scares, today! --------------------- It's Saturday, October 31st, 1981. Do you know where your children are? For three young boys, Rob Hanson, Craig Chambers, and Rick Davenport, Saturdays in their sleepy Carolina town mean a day of childhood fun: watching cartoons in the morning, goofing off by the creek, and playing arcade games at the local store. This year, when Halloween falls upon a Saturday, they get to add scary costumes, horror movies, pumpkin carving, and trick-or-treating to their lists. Excitedly, they set out on their bicycles for the day, looking for adventure. But, what they find instead... is a supernatural menace that not only threatens their hometown, but the entire world as well. When their pleas for help fall upon the deaf ears of the townsfolk, they realize that it's up to them to make a stand and fight the forces of evil alone. Now, with everything they know in danger, their only hope in saving the day lies with the power of friendship, and the magic of Halloween... -------------------------------------- If you love Halloween, are a child of the 80s, or are just young at heart, you simply cannot miss "ALL THE KIDS LOVE THAT SCARY STUFF." It's an exciting Halloween tale in the tradition of the great "Kids VS Creeps" films of the 1980s. It features a maniacal villain with an evil plan, smart kids on bicycles trying to save the Earth, and a town full of adults who never listen. Throw in a ton of childhood memories, pack it full of fun 1980s references, and you get a great time for young and old alike! Kids will love the scary adventure. Adults will love the nostalgia. It's the first in the series of HALLOW'EVE books, sure to become a holiday tradition. Buy it. Read it. Love it, Share it. Enjoy!

Knuckleheads in the News Sep 02 2022 YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves

pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.

LINUX Beginner's Crash Course Feb 01 2020 Become a Linux Superstar! What if you could learn about Linux in a simple, easy to follow format? Can you imagine the doors that will be open to you once you gain that knowledge? Tracing its roots back to the mid 90's, Linux came to life and has become existent in almost every gadget you see around your home. Linux has unique technical aspects, which makes it distinct from other operating systems out there. To take advantage of its specialties, one must know how to operate it, and this book is made just for that purpose! In fact, all Quick Start Guide books are aimed to get you the knowledge you need in an easy to learn and easy to apply method. Our philosophy is we work hard so you don't have to! Linux Beginner's Crash Course is your user manual to understanding how it works, and how you can perfectly manipulate the command line with ease and confidence. So...Why Be Interested in Linux? -Cost: It's free and readily available -Freedom: Take full control of your desktop and kernel -Flexibility: Strong structural components that allows you to customize your computer however you want it. What Will You Learn in this Book? 1. Linux Overview 2. Components of Linux 3. The Linux Kernel 4. Linux Processes 5. Linux File Systems 6. Linux Processes 7. Linux Processes This tutorial is going to help you master the use of LINUX and make you even more computer literate. Everything takes time and learning, and with this book, you are one step away to becoming a pro! Read this book now to quickly learn Linux and open yourself up to a whole new world of possibilities! Pick up your copy today. See you on the inside so we can get to work!

Under-Rewarded Efforts Aug 01 2022 Why has an economy that has done so many things right failed to grow fast? Under-Rewarded Efforts traces Mexico's disappointing growth to flawed microeconomic policies that have suppressed productivity growth and nullified the expected benefits of the country's reform efforts. Fast growth will not occur doing more of the same or focusing on issues that may be key bottlenecks to productivity growth elsewhere, but not in Mexico. It will only result from inclusive institutions that effectively protect workers against risks, redistribute towards those in need, and simultaneously align entrepreneurs' and workers' incentives to raise productivity.

Power Pneumatics Jul 08 2020 This is the most complete, up-to-date guide to power pneumatics system design, component selection, and problem solving. This book presents power pneumatics from the systems standpoint, with extensive coverage of system design and component selection. Compressed air generation, processing and distribution are covered at length. The operation and application of values and actuators is covered from both a practical and theoretical viewpoint. Pneumatic circuitry is explained, along with a range of solutions to both pneumatic and electro-pneumatic problems. System controls discussed range from mechanical up to PLC/PC operations, and a chapter on the application of logic assists in problem solving. Practical advice is provided for installation, maintenance and troubleshooting. A final chapter on design draws together information from the entire book to show how significant design problems can be solved. This book is for any professional or student working in the field of power pneumatics.

LCA of an ecolabeled notebook : consideration of social and environmental impacts along the entire life cycle Sep 21 2021 This study investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle. In order to analyse the divers effects of the laptop, a social life cycle assessment and an environmental life cycle assessment were performed in parallel. Both assessments together provide a holistic overview of positive and negative impacts in regard to social and environmental sustainability.This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development. It comprises the methodological background, the social inventory, process modifications with regard to the environmental inventory, and detailed results of the impact assessment phase. Further, a newly developed social impact assessment method is presented and applied. In addition, recommendations on company and policy level were derived.

Social Enterprise, Health, and Wellbeing Jul 20 2021 In recent decades, governments have promoted social enterprise as a means to address welfare and tackle disadvantage. Early academic work on social enterprises reflected this development and engaged with their ability to deliver and create jobs, work towards remedial environmental goals, and address a range of societal challenges. More recently, researchers have started to investigate the broader potential of social enterprise for the wellbeing of people and the planet. In this context, this book aims to answer the question: In what ways can social enterprises improve the health and wellbeing of individuals and communities? The chapters in this edited collection take different perspectives on assessing how social enterprises address disadvantage and deliver health and wellbeing impacts. Drawing on evidence from international research studies, Social Enterprise, Health, and Wellbeing: Theory, Methods, and Practice presents the 'first wave' of innovative research on this topic and provides a platform of evidence to inspire the next generation of scholarly and policy interest. Drawing on the cutting edge of interdisciplinary research in the field, this book will be of interest to researchers, academics, policymakers, and students in the fields of entrepreneurship, public and social policy, community development, public health, human geography, and urban planning.
