The Strategic Guide to Shaping Your Student Affairs Career will be a must read for our students."--Audrey J. Jaeger, Professor, Educational Leadership & Policy Analysis: Higher Education, Co-Executive Director, National Initiative for Leadership & Institutional Effectiveness, North Carolina State University This is a book for any student affairs professional who wants to strategically shape his or her career path, whether in early or mid-career, or contemplating a career, in student affairs. She begins by describing the changing and varied student populations who are the heart of this field, and outlines the typical organizational structures of student affairs, the range of functional areas, and how practice varies by size and type of institution. She highlights major trends, discusses the typical paths of entry to the profession, the expectations and realities of starting in a new position, the process of socialization, and the required skills and competencies. She devotes the core of the book to the five key elements for developing a career strategy. In doing so she ranges over choices to be made about formal qualifications, and describes activities - from volunteering and committee work to conference presentations, writing and teaching - that we can use to strategically develop the proficiencies to attain our goals.

EASYUNI Ultimate University Guide 2014 Mar 25 2022 Hi there! It's nice to present you once again with another 'hot' issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni's existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia's most popular education portals, committed to helping students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and "study abroad" consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn't it? The issue you're holding now has so much to offer as well. So, read every page and fill yourself with all the knowledge needed to make informed decisions about your higher education.

Five Dimensions of Quality Jun 23 2019 Meet calls for increased quality and understand accreditation expectations Author Linda Suskie is internationally recognized for her work in higher education assessment, and she is a former vice president of a major regional accreditor. In Five Dimensions of Quality: A Common Sense Guide to Accreditation and Accountability in Higher Education she provides a simple, straightforward model for understanding and meeting the calls for increased quality in higher education ever-present in today's culture. Whether your institution is seeking accreditation or not, the five dimensions she outlines will help you to identify ways to improve institutional quality and demonstrate that quality to constituents. For those wading through the accreditation process, which has become more difficult in recent years due to increasing regulation and pressure for greater accountability, Suskie offers expert guidance on understanding the underlying principles of the expectations of accrediting bodies. Using the model presented here, which is much easier to understand than the sometimes complex resources provided by individual accrediting bodies, American colleges and universities can understand what they need to do to earn and maintain their regional accreditation as well as improve overall institutional quality for their students. You'll be able to: Identify ways to improve institutional quality Demonstrate the quality of your institution to internal and external constituents Avoid wasting time and energy on misguided institutional processes to comply with accreditation requirements By focusing on why colleges and universities should take particular actions rather than only on what those actions should be, Five Dimensions of Quality gives them the knowledge and strategies to prepare for a successful review. It is an ideal resource for leaders, accreditation committee members, and everyone on campus.
