A Year on the Streets Aug 07 2020 Ten years of working in Soup Kitchens has given the Author a privileged glimpse into another world. Reading the Rocks Sep 27 2019 A rich and exuberant group biography of the early geologists, the people who were first to excavate from the layers of the world its buried history. The birth of geology was fostered initially by gentlemen whose wealth supported their interests, but in the nineteenth century, it was advanced by clergymen, academics, and women whose findings expanded the field. Reading the Rocks brings to life this eclectic cast of characters who brought passion, eccentricity, and towering intellect to the discovery of how Earth was formed. Geology opened a window on the planet's ancient past. Contrary to the Book of Genesis, the rocks and fossils dug up showed that Earth was

immeasurably old. Moreover, fossil evidence revealed progressive changes in life forms. It is no coincidence that Charles Darwin was a keen geologist. Acclaimed biographer and science writer Brenda Maddox's story goes beyond William Smith, the father of English geology; Charles Lyell, the father of modern geology; and James Hutton, whose analysis of rock layers unveiled what is now called "deep time." She also explores the lives of fossil hunter Mary Anning, the Reverend William Buckland, Darwin, and many others--their triumphs and disappointments, and the theological, philosophical, and scientific debates their findings provoked. *Reading the Rocks* illustrates in absorbing and revelatory details how this group of early geologists changed irrevocably our understanding of the world.

Hardened New Yorkers rush for warmth and, while they're absent, an amazing, glistening almost deserted winter wonderland momentarily appears. It is these moments that phenomenally popular photo-blogger Vivienne Gucwa lives for. She has been documenting them for more than a decade, rushing out to capture the city in snow. **Forestry Applications of Unmanned Aerial Vehicles (UAVs)** 2019 Apr 14 2021 Unmanned aerial vehicles (UAVs) are new platforms that have been increasingly used in the last few years for forestry applications that benefit from the added value of flexibility, low cost, reliability, autonomy, and capability of timely provision of high-resolution data. The main adopted image-based technologies are RGB, multispectral, and thermal infrared. LiDAR sensors are becoming commonly used to improve the estimation of relevant plant traits. In comparison with other permanent ecosystems, forests are particularly affected by climatic changes due to the longevity of the trees, and the primary objective is the conservation and protection of forests. Nevertheless, forestry and agriculture involve the cultivation of renewable raw materials, with the difference that forestry is less tied to economic aspects and this is reflected by the delay in using new monitoring technologies. The main forestry applications

are aimed toward inventory of resources, map diseases, species classification, fire monitoring, and spatial gap estimation. This Special Issue focuses on new technologies (UAV and sensors) and innovative data elaboration methodologies (object recognition and machine vision) for applications in forestry.

*Sixty Years in Sixty Minutes* Jun 28 2022 This is a portfolio of a mixed bag of events, and objects that have caught my eye and been recorded as of interest to me. Ilford's old slogan "For Faces and Places," was very apt. It could take just sixty minutes to look through the book or you may want to look through sixty times who knows? It spans a sixty-year period of life which has passed by my lens. I have selected the most memorable ones, which are likely to mean more to viewers beyond the family circle so to speak. Photography can be so, so personal I have found. Many of these images can never be repeated. Some will stand the test of time better than others. I would like to think that British Amateur Photojournalism never dies and ordinary people such as myself can and will make the effort to continue recording for posterity. In black and white please, it has for me and many enthusiasts alike, an archaic charm that no other art form can beat.
