The Common Core Companion: The Standards Decoded, Grades 3-5 Oct 28 2019 Don't spend another minute poring over the standards. Focus instead on how to teach them, using 'The Common Core Companion, Grades

3-5', as your one-stop guide across subjects. Burke has already done the hard work for you with this roadmap of what each standard says, what each standard means, and how precisely to put that standard into practice across English language arts, social studies, science, and technical subjects.

Solid Waste Recycling and Processing Jun 24 2019 Solid Waste Recycling and Processing, Second Edition, provides best-practice guidance to solid waste managers and recycling coordinators. The book covers all aspects of solid waste processing, volume reduction, and recycling, encompassing typical recyclable materials (paper, plastics, cans, and organics), construction and demolition debris, electronics, and more. It includes techniques, technologies, and programs to help maximize customer participation rates and revenues, as well as to minimize operating costs. The book is packed with lessons learned by the author during the implementation of the most successful programs worldwide, and includes numerous case studies showing how different systems work in different settings. This book also takes on industry debates such as the merits of curbside-sort versus single-stream recycling and the use of advanced technology in materials recovery facilities. It provides key facts and figures, and brief summaries of legislation in the United States, Europe, and Asia. An extensive glossary demystifies the terminology and acronyms used in different sectors and geographies. The author also explains emerging concepts in recycling such as zero waste, sustainability, LEED certification, and pay-as-you-throw, and places waste management and recycling in wider economic, environmental (sustainability), political, and societal contexts. Covers single- and mixed-waste streams Evaluates the technologies and tradeoffs of recycling of materials vs. integrated solutions, including combustion and other transformational options Covers recycling as part of the bigger picture of solid waste management, processing and disposal

Teaching History Sep 27 2019 Against a background of controversy surrounding the teaching of history, this reader gathers the current thoughts of the leading practitioners. The development of school history up to the national curriculum and beyond is traced, and the main issues concerning history teachers today are examined. These issues include access to history, the definition of 'British' history in a multicultural society, gender and the place of history with the humanities. Progression and attainment are discussed as is the development of pupil's historical understanding, and practical approaches to teaching history to 11-18 level pupils are explored.
