Catalog of Copyright Entries, Third Series Aug 07 2020 Includes Part 1, Number 2: Books and Pamphlets, Including Serials and Contributions to Periodicals (July - December)

Machine Habitus Apr 02 2020 We commonly think of society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the relevant and the irrelevant, the likely and the unlikely -- on and beyond platforms. Drawing on the work of Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoldi shows how society shapes algorithmic code, and how the code guides the practical behaviour of the code in the culture, shaping society in turn. The machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial intelligence in the context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information science and to anyone interested in the growing role of algorithms and AI in our social and cultural life.

Original Triumph TR7 and TR8 Jul 18 2021 When the TR7 was introduced, it was a complete contrast to Triumph's traditional TR sports cars. Whereas the former sported a traditional, British image, the newer model presented a modern profile. This book is guaranteed to come to the rescue of owners attempting to determine which parts, accessories, and colours will restore their vehicle to factory-original condition.
