Non-prototypical Clefts in French Mar 26 2022 This monograph is the first
large-scale corpus analysis of French il y a clefts. While most research on

clefts focusses on the English 'prototypical' it-cleft and its equivalents across languages, this study examines the lesser-known il y a clefts – of both presentational-eventive and specificational type – and provides an in-depth analysis of their syntactic, semantic and discourse-functional properties. In addition to an extensive literature review and a comparison with Italian c'è clefts and with French c'est clefts, the strength of the study lies in the critical approach it develops to the common definition of clefts. Several commonly used criteria for clefts are applied to the corpus data, revealing that these criteria often lead to ambiguous results. The reasons for this ambiguity are explored, thus leading to a better understanding of what constitutes a cleft. In this sense, the analysis will be of interest to specialists of Romance and non-Romance clefts alike.

The Impact of Tablet PCs and Pen-based Technology on Education 2007
2022 A wide variety of disciplines are embracing Tablet PC's and similar pen-based devices as tools for the radical enhancement of teaching and learning. Deployments of Tablet PCs have spanned the K-12, undergraduate, and graduate levels and have dealt with an amazingly diverse range of subject areas. This work is aimed at identifying best practices in the educational use of pen-based computing so that all educators may benefit from this next generation of technology.
