[The Leavers \(National Book Award Finalist\)](#) Mar 26 2022 FINALIST FOR THE 2017 NATIONAL BOOK AWARD FOR FICTION Named a Best Book of 2017 by NPR, Entertainment Weekly, the Los Angeles Times, BuzzFeed, Bustle, and Electric Literature “There was a time I would have called Lisa Ko’s novel beautifully written, ambitious, and moving, and all of that is true, but it’s more than that now: if you want to understand a forgotten and essential part of the world we live in, *The Leavers* is required reading.” —Ann Patchett, author of *Commonwealth* Lisa Ko’s powerful debut, *The Leavers*, is the winner of the 2016 PEN/Bellwether Prize for Fiction, awarded by Barbara Kingsolver for a novel that addresses issues of social justice. One morning, Deming Guo’s mother, Polly, an undocumented Chinese immigrant, goes to her job at a nail salon—and never comes home. No one can find any trace of her. With his mother gone, eleven-year-old Deming is left mystified and bereft. Eventually adopted by a pair of well-meaning white professors, Deming is moved from the Bronx to a small town upstate and renamed Daniel Wilkinson. But far from all he’s ever known, Daniel struggles to reconcile his adoptive parents’ desire that he assimilate with his memories of his mother and the community he left behind. Told from the perspective of both Daniel—as he grows into a directionless young man—and Polly, Ko’s novel gives us one of fiction’s most singular mothers. Loving and selfish, determined and frightened, Polly is forced to make one heartwrenching choice after another. Set in New York and China, *The Leavers* is a vivid examination of borders and belonging. It’s a moving story of how a boy comes into his own when everything he loves is taken away, and how a mother learns to live with the mistakes of the past.

[Spectrum Spelling, Grade 4](#) Mar 02 2020 Give your fourth grader a fun-filled way to build and reinforce spelling skills. *Spectrum Spelling for grade 4* provides progressive lessons in prefixes, suffixes, vowel sounds, compound words, easily misspelled words, and dictionary skills. This exciting language arts workbook encourages children to explore spelling with brainteasers, puzzles, and more! Don’t let your child’s spelling skills depend on spellcheck and autocorrect. Make sure they have the knowledge and skills to choose, apply, and spell words with confidence—and without assistance from digital sources. Complete with a speller’s dictionary, a proofreader’s guide, and an answer key, *Spectrum Spelling* offers the perfect way to help children strengthen this important language arts skill.

The System of Objects Aug 19 2021 The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “schizofunctional.” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille’s political economy of “expenditure” and Mauss’s theory of the gift; Reisman’s lonely crowd and the “technological society” of Jacques Ellul; the structuralism of Roland Barthes in The System of Fashion; Henri Lefebvre’s work on the social construction of space; and last, but not least, Guy Debord’s situationist critique of the spectacle.

The Copyeditor's Handbook Dec 31 2019 The Copyeditor's Handbook is a lively, practical manual for newcomers to publishing and for experienced editors who want to fine-tune their skills or broaden their understanding of the craft. Addressed to copyeditors in book publishing and corporate communications, this thoughtful handbook explains what copyeditors do, what they look for when they edit a manuscript, and how they develop the editorial judgment needed to make sound decisions. This revised edition reflects the most recent editions of The Chicago Manual of Style (15th ed.), the Publication Manual of the American Psychological Association (5th ed.), and Merriam-Webster's Collegiate Dictionary (11th ed.).

Why Don't Students Like School? Oct 01 2022 Easy-to-apply, scientifically-based approaches for engaging students in the classroom Cognitive scientist Dan Willingham focuses his acclaimed research on the biological and cognitive basis of learning. His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom. Corporate trainers, marketers and, not least, parents -anyone who cares about how we learn- should find his book valuable reading." —Wall Street Journal

Wishtree Jul 30 2022 The New York Times-bestselling story of kindness, friendship, and hope. Trees can't tell jokes, but they can certainly tell stories. . . . Red is an oak tree who is many rings old. Red is the neighborhood "wishtree"—people write their wishes on pieces of cloth and tie them to Red's branches. Along with a crow named Bongo and other animals who seek refuge in Red's hollows, this wishtree watches over the neighborhood. You might say Red has seen it all. Until a new family moves in. Not everyone is welcoming, and Red's experience as a wishtree is more important than ever. Funny, deep, warm, and nuanced, this is Katherine Applegate at her very best—writing from the heart, and from a completely unexpected point of view. This book has Common Core connections.

Chemistry 2e May 28 2022

The Hill We Climb Jun 16 2021 The instant #1 New York Times bestseller and #1 USA Today bestseller Amanda Gorman’s electrifying and historic poem “The Hill We Climb,” read at President Joe Biden’s inauguration, is now available as a collectible gift edition. “Stunning.” —CNN “Dynamic.” —NPR “Deeply rousing and uplifting.” —Vogue On January 20, 2021, Amanda Gorman became the sixth and youngest poet to deliver a poetry reading at a presidential inauguration. Taking the stage after the 46th president of the United States, Joe Biden, Gorman captivated the nation and brought hope to viewers around the globe with her call for unity and healing. Her poem “The Hill We Climb: An Inaugural Poem for the Country” can now be cherished in this special gift edition, perfect for any reader looking for some inspiration. Including an enduring foreword by Oprah Winfrey, this remarkable keepsake celebrates the promise of America and affirms the power of poetry.

Step-by-Step Problem Solving, Grade 4 Aug 26 2019 This reproducible workbook presents problem-solving strategies and practice problems divided up into units according to skill or strategy.

Austerity Jun 24 2019 Selected as a Financial Times Best Book of 2013 Governments today in both Europe and the United States have succeeded in casting government spending as reckless wastefulness that has made the economy worse.

In contrast, they have advanced a policy of draconian budget cuts--austerity--to solve the financial crisis. We are told that we have all lived beyond our means and now need to tighten our belts. This view conveniently forgets where all that debt came from. Not from an orgy of government spending, but as the direct result of bailing out, recapitalizing, and adding liquidity to the broken banking system. Through these actions private debt was rechristened as government debt while those responsible for generating it walked away scot free, placing the blame on the state, and the burden on the taxpayer. That burden now takes the form of a global turn to austerity, the policy of reducing domestic wages and prices to restore competitiveness and balance the budget. The problem, according to political economist Mark Blyth, is that austerity is a very dangerous idea. First of all, it doesn't work. As the past four years and countless historical examples from the last 100 years show, while it makes sense for any one state to try and cut its way to growth, it simply cannot work when all states try it simultaneously: all we do is shrink the economy. In the worst case, austerity policies worsened the Great Depression and created the conditions for seizures of power by the forces responsible for the Second World War: the Nazis and the Japanese military establishment. As Blyth amply demonstrates, the arguments for austerity are tenuous and the evidence thin. Rather than expanding growth and opportunity, the repeated revival of this dead economic idea has almost always led to low growth along with increases in wealth and income inequality. Austerity demolishes the conventional wisdom, marshaling an army of facts to demand that we austerity for what it is, and what it costs us.

What Technology Wants Aug 07 2020 From the author of the New York Times bestseller The Inevitable—a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed-or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Policy Implications of Greenhouse Warming Apr 26 2022 Global warming continues to gain importance on the international agenda and calls for action are heightening. Yet, there is still controversy over what must be done and what is needed to proceed. Policy Implications of Greenhouse Warming describes the information necessary to make decisions about global warming resulting from atmospheric releases of radiatively active trace gases. The conclusions and recommendations include some unexpected results. The distinguished authoring committee provides specific advice for U.S. policy and addresses the need for an international response to potential greenhouse warming. It offers a realistic view of gaps in the scientific understanding of greenhouse warming and how much effort and expense might be required to produce definitive answers. The book presents methods for assessing options to reduce emissions of greenhouse gases into the atmosphere, offset emissions, and assist humans and unmanaged systems of plants and animals to adjust to the consequences of global warming.

Artemis Feb 22 2022 The bestselling author of The Martian returns with an irresistible new near-future thriller—a heist story set on the moon. Jasmine Bashara never signed up to be a hero. She just wanted to get rich. Not crazy, eccentric-billionaire rich, like many of the visitors to her hometown of Artemis, humanity's first and only lunar colony. Just rich enough to move out of her coffin-sized apartment and eat something better than flavored algae. Rich enough to pay off a debt she's owed for a long time. So when a chance at a huge score finally comes her way, Jazz can't say no. Sure, it requires her to graduate from small-time smuggler to full-on criminal mastermind. And it calls for a particular combination of cunning, technical skills, and large explosions—not to mention sheer brazen swagger. But Jazz has never run into a challenge her intellect can't handle, and she figures she's got the 'swagger' part down. The trouble is, engineering the perfect crime is just the start of Jazz's problems. Because her little heist is about to land her in the middle of a conspiracy for control of Artemis itself. Trapped between competing forces, pursued by a killer and the law alike, even Jazz has to admit she's in way over her head. She'll have to hatch a truly spectacular scheme to have a chance at staying alive and saving her city. Jazz is no hero, but she is a very good criminal. That'll have to do. Propelled by its heroine's wisecracking voice, set in a city that's at once stunningly imagined and intimately familiar, and brimming over with clever problem-solving and heist-y fun, Artemis is another irresistible brew of science, suspense, and humor from #1 bestselling author Andy Weir.

The Rise of the Robots May 16 2021 Intelligent algorithms are already well on their way to making white collar jobs obsolete: travel agents, data-analysts, and paralegals are currently in the firing line. In the near future, doctors, taxi-drivers and ironically even computer programmers are poised to be replaced by 'robots'. Without a radical reassessment of our economic and political structures, we risk the very implosion of the capitalist economy itself. In The Rise of the Robots, technology expert Martin Ford systematically outlines the achievements of artificial intelligence and uses a wealth of economic data to illustrate the terrifying societal implications. From health and education to finance and technology, his warning is stark – all jobs that are on some level routine are likely to eventually be automated, resulting in the death of traditional careers and a hollowed-out middle class. The robots are coming and we have to decide – now – whether the

future will bring prosperity or catastrophe.

Introductory Chemistry Oct 21 2021 The Seventh Edition of Zumdahl and DeCoste's best-selling **INTRODUCTORY CHEMISTRY: A FOUNDATION** that combines enhanced problem-solving structure with substantial pedagogy to enable students to become strong independent problem solvers in the introductory course and beyond. Capturing student interest through early coverage of chemical reactions, accessible explanations and visualizations, and an emphasis on everyday applications, the authors explain chemical concepts by starting with the basics, using symbols or diagrams, and conclude by encouraging students to test their own understanding of the solution. This step-by-step approach has already helped hundreds of thousands of students master chemical concepts and develop problem-solving skills. The book is known for its focus on conceptual learning and for the way it motivates students by connecting chemical principles to real-life experiences in chapter-opening discussions and Chemistry in Focus boxes. The Seventh Edition now adds a questioning pedagogy to in-text examples to help students learn what questions they should be asking themselves while solving problems, offers a revamped art program to better serve visual learners, and includes a significant number of revised end-of-chapter questions. **Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.**

The Prince Apr 02 2020 Can one girl save the world? From USA Today bestselling author Jillian Dodd comes the first book in a sizzling new series filled with action and adventure. Fans of *The Selection* and *The Hunger Games* will discover a heart-pounding thrill ride of espionage and suspense set in glittering high society. An eighteen-year-old covert agent is pulled out of training before graduation by Black X, an espionage group so secret even the President of the United States doesn't know it exists. For her first mission, she must go undercover as the long-lost daughter of a recently deceased billionaire, infiltrate high society, and protect the Prince of Montrovia from assassination. But Prince Lorenzo is known as the Playboy Prince for a reason and his sensuality and charisma add a whole other level of complication to her mission. She knows that her every move is being watched, but what she doesn't know is that the Prince is just a chess piece in a bigger game that will have world-wide ramifications. And that Blackwood Academy, the place she has called home for the past six years, has secrets of its own. With a kickass heroine and intrigue, this page turner will have you spellbound and drooling over your new book boyfriend. - H.M Ward, NYT Bestselling author *The Spy Girl* series is an intrigue filled, exciting ride through a world you'll wish you were part of and want to know more about! - J. The Dangerous Book for Boys Sep 19 2021 The bestselling book for every boy from eight to eighty, covering essential boyhood skills such as building tree houses*, learning how to fish, finding true north, and even answering the age old question of what the big deal with girls is. In this digital age there is still a place for knots, skimming stones and stories of incredible courage. This book recaptures Sunday afternoons, stimulates curiosity, and makes for great father-son activities. The brothers Conn and Hal have put together a wonderful collection of all things that make being young or young at heart fun—building go-carts and electromagnets, identifying insects and spiders, and flying the world's best paper airplanes. The completely revised American Edition includes: *The Greatest Paper Airplane in the World* *The Seven Wonders of the Ancient World* *The Five Knots Every Boy Should Know* *Stickball Slingshots* *Fossils* *Building a Treehouse** *Making a Bow and Arrow* *Fishing (revised with US Fish)* *Timers and Tripwires* *Baseball's "Most Valuable Players"* *Famous Battles-Including Lexington and Concord, The Alamo, and Gettysburg* *Spies-Codes and Ciphers* *Making a Go-Cart* *Navajo Code Talkers' Dictionary* *Girls* *Cloud Formations* *The States of the U.S.* *Mountains of the U.S.* *Navigation* *The Declaration of Independence* *Skimming Stones* *Making a Periscope* *The Ten Commandments* *Common US Trees* *Timeline of American History* * For more information on building treehouses, visit www.treehouse-books.com and www.stilesdesigns.com or see "Treehouses You Can Actually Build" by David Stiles

Cece Loves Science: Push and Pull Oct 28 2019 Cece loves science! In this STEM-themed Level 3 *I Can Read!* title, Cece and her friend Isaac learn about the opposite forces of push and pull, and use their new knowledge to create a treat

dispenser for Cece's dog, Einstein. Perfect for aspiring scientists, emerging readers, and fans of Andrea Beaty's Ada Twist, Scientist. Cece loves science—and experimenting! In this Cece Loves Science Level 3 I Can Read!, Cece's teacher, Miss Curie, explains the opposite forces of push and pull. To demonstrate this concept, she divides the class into two teams. Each team must make a treat dispenser for Cece's dog, Einstein, that uses both forces. Cece and her classmates rely on science, creativity, and teamwork—and they learn a lot along the way. The Cece Loves Science books introduce readers to basic concepts of science, technology, engineering, and math, and are perfect for the classroom. This Level 3 I Can Read! focuses on basic scientific vocabulary and includes a glossary of terms and fun activities for readers to try on their own. A great pick for beginning readers!

Not a Good Day to Die Feb 10 2021 Award-winning combat journalist Sean Naylor reveals a firsthand account of the largest battle fought by American military forces in Afghanistan in an attempt to destroy al-Qaeda and Taliban forces. At dawn on March 2, 2002, America's first major battle of the 21st century began. Over 200 soldiers of the 101st Airborne and 10th Mountain Division flew into Afghanistan's Shah-i-Kot Valley—and into the mouth of a buzz saw. They were about to pay a bloody price for strategic, high-level miscalculations that underestimated the enemy's strength and willingness to fight. Naylor, an eyewitness to the battle, details the failures of military intelligence and planning, while vividly portraying the astonishing heroism of these young, untested US soldiers. Denied the extra support with which they trained, these troops nevertheless proved their worth in brutal combat and prevented an American military disaster.

Miles and Miles of You Dec 11 2020 Get on board with @SoSavvyTraveler! Lucy Gonzalez might have once been a stressed personal assistant, but now she's hitched up her grandma's bitchin' vintage Airstream and hitting the road with all the best places to find cheap eats and see the sights on a shoestring budget. And she has company along for the ride. If those thirst-worthy abs seem familiar, it's because they belong to billionaire Miles Hart. True story, he used to be Lucy's boss until she quit on him. Something about not being appreciated? Anyway, you will appreciate Miles—and his groveling—plenty on this trip. Now, you have front-row seats to the hottest trip of the year. Sparks! Fireworks! Unexpected smooching! And you won't want to miss the jaw-dropping surprise that will make this destination totally worth the hilarious journey...

An Introduction to Chemistry Nov 29 2019 Bishop's text shows students how to break the material of preparatory chemistry down and master it. The system of objectives tells the students exactly what they must learn in each chapter and where to find it.

Los Angeles Magazine Sep 27 2019 Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture, entertainment, fashion, art and architecture, and news that define Southern California. The magazine continues to be the definitive resource for an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

Bonds That Make Us Free Aug 31 2022

The Double Helix Jun 28 2022 The classic personal account of Watson and Crick's groundbreaking discovery of the structure of DNA, now with an introduction by Sylvia Nasar, author of A Beautiful Mind. By identifying the structure of DNA, the molecule of life, Francis Crick and James Watson revolutionized biochemistry and won themselves a Nobel Prize. At the time, Watson was only twenty-four, a young scientist hungry to make his mark. His uncompromisingly honest account of the heady days of their thrilling sprint against other world-class researchers to solve one of science's greatest mysteries gives a dazzlingly clear picture of a world of brilliant scientists with great gifts, very human ambitions, and bitter rivalries. With humility unspoiled by false modesty, Watson relates his and Crick's desperate efforts to beat Linus Pauling to the Holy Grail of life sciences, the identification of the basic building block of life. Never has a scientist been so truthful in capturing in words the flavor of his work.

Chemical Structure and Reactivity Jul 18 2021 Chemical Structure and Reactivity: An Integrated Approach rises to the challenge of depicting the reality of chemistry. Offering a fresh approach, it depicts the subject as a seamless discipline, showing how organic, inorganic, and physical concepts can be blended together to achieve the common goal of understanding chemical systems.

Clean My Space Mar 14 2021 The wildly popular YouTube star behind Clean My Space presents the breakthrough solution to cleaning better with less effort Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution: • Identify the most important areas (MIAs) in your home that need attention • Select the proper products, tools, and techniques (PTT) for the job • Implement these new cleaning routines so that they stick Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!)

her lightning fast 5-10 minute “express clean” routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa’s simple groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

Fuzzy Mud Apr 14 2021 From the author of the acclaimed bestseller Holes, winner of the Newbery Award and the National Book Award, comes a New York Times bestselling adventure about the impact we have—both good and bad—on the world we live in. Be careful. Your next step may be your last. Fifth grader Tamaya Dhilwaddi and seventh grader Marshall Walsh have been walking to and from Woodridge Academy together since elementary school. But their routine is disrupted when bully Chad Hilligas challenges Marshall to a fight. To avoid the conflict, Marshall takes a shortcut home through the off-limits woods. Tamaya, unaware of the reason for the detour, reluctantly follows. They soon get lost. And then they find trouble. Bigger trouble than anyone could ever have imagined. In the days and weeks that follow, the authorities and the U.S. Senate become involved, and what they uncover might affect the future of the world. "Sachar blends elements of mystery, suspense, and school-day life into a taut environmental cautionary tale."--Publishers Weekly Technological Slavery (Large Print 16pt) Jan 12 2021 Theodore Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious "Unabomber Manifesto," Kaczynski, s critique of anarcho-primitivism, and essays regarding "the Coming Revolution."

Timebound Jul 26 2019 When a murder in the past destroys the foundation of her present-day life, Kate uses her genetic ability to time-travel to stop the murder and attempt to change the timeline--which may erase the memory of the boy she loves.

The Adrenal Reset Diet Jul 06 2020 Go from wired and tired to lean and thriving with The Adrenal Reset Diet Why are people gaining weight faster than ever before? The idea that people simply eat too much is no longer supported by science. The emerging idea is that weight gain is a survival response: Our bodies are under attack from all directions—an overabundance of processed food, a polluted world, and the pressures of daily life all take their toll. These attacks hit a very important set of glands, the adrenals, particularly hard. The adrenal glands maintain a normal cortisol rhythm (cortisol is a hormone associated with both stress and fat storage). When this rhythm is off, we can become overwhelmed more quickly, fatigued, gain weight, and eventually, develop even more severe health issues such as heart disease or diabetes. In The Adrenal Reset Diet, Dr. Alan Christianson provides a pioneering plan for optimal function of these small but powerful organs. His patient-tested weight-loss program is the culmination of decades of clinical experience and over 75,000 patient-care visits. In a study at his clinic, participants on the Adrenal Reset Diet reset their cortisol levels by over 50% while losing an average of over 2 inches off their waists and 9 pounds of weight in 30 days. What can you expect? • Learn whether your adrenals are Stressed, Wired and Tired, or Crashed and which adrenal tonics, exercises, and foods are best for you • The clinically proven shakes, juices, and other delicious recipes, to use for your Reset • New ways to turn off the triggers of weight gain with carbohydrate cycling, circadian repair, and simple breathing exercises • An easy 7-day ARD eating plan to move your and your adrenals from Surviving to Thriving

Ask A Historian Nov 09 2020 'Jenner uses all the questions you never dared to ask about history as an excellent excuse to rummage around in some funny, fascinating, and downright peculiar corners of the past. Every page contains delights, and you will be illuminated and entertained in equal measure.' Lindsey Fitzharris, author of The Butchering Art 'If history informs our future, Greg Jenner is one of the best informants out there. He is a natural story-teller, conveying complex ideas and events with pep, verve, and wit. For anyone who regularly asks the question 'Why?', this book is for you.' Susie Dent, author of Word Perfect Why is Italy called Italy? How old is curry? Which people from history would best pull off a casino heist? Who was the richest person of all time? When was the first Monday? What were history's weirdest medical procedures that actually worked? How much horse manure was splattered on the streets of Tudor London? How fast was the medieval Chinese postal system? What did the Flintstones get right about the Stone Age? Who gets to name historical eras, and what will ours be called in 100 years' time? How do we know how people sounded in the past? How old is sign language? In Ask a Historian the author, BBC podcaster, and public historian Greg Jenner provides answers to things you always wondered about, but didn't know who to ask. Responding to 50 genuine questions from the public, Greg whisks you off on an entertaining tour through the ages, revealing the best and most surprising stories, facts, and historical characters from the past. Bouncing through a wide range of subjects - from ancient jokebooks, African empires, and bizarre tales of medicinal cannibalism, to the invention of meringues, mirrors, and menstrual pads - Ask A Historian spans the Stone Age to the Swinging Sixties, and offers up a deliciously amusing and

informative smorgasbord of historical curiosities, devoured one morsel at a time.

*Annie's Life in Lists Jan 30 2020 For Annie, lists are how she keeps her whole life in order. And there is a lot to keep track of! Do you love Anastasia Krupnik, Ramona Quimby, and the Penderwicks? Then you will love Annie! Annie's a shy fifth grader with an incredible memory and a love of making lists. It helps her keep track of things when they can seem a little out of control, like her family, her friends, and her life in a new place. Annie has: 1. An incredible memory (really, it's almost photographic) that can get her in trouble. 2. A brother who is mad at her because he thinks she is the reason they had to move to Clover Gap, population 8,432. 4. A best friend who she is (almost) certain will always be her best friend. 5. New classmates, some of whom are nicer than others. 6. A rocky start finding her place in her new home. From the author of *The 47 People You'll Meet in Middle School*, *Annie's Life in Lists* finds that even amid the chaos of everyday life, it's important to put things in order. "Perfect for anyone who's ever worried about starting a new school, saying the wrong thing, dying of embarrassment, or losing a best friend. I loved getting to know Annie through her lists!" --Kelly Jones, author of *Unusual Chickens for the Exceptional Poultry Farmer**

Water and Biomolecules Nov 02 2022 Life is produced by the interplay of water and biomolecules. This book deals with the physicochemical aspects of such life phenomena produced by water and biomolecules, and addresses topics including "Protein Dynamics and Functions", "Protein and DNA Folding", and "Protein Amyloidosis". All sections have been written by internationally recognized front-line researchers. The idea for this book was born at the 5th International Symposium "Water and Biomolecules", held in Nara city, Japan, in 2008.
