Privacy-Law of Civil Liberties Jan 05 2021 The right to privacy, or the right to private life, is at the heart of individual freedom and the right to be free from arbitrary government interference. The United Kingdom, although part of the European Union, has privacy issues unlike EU member states of Germany and France, for example, and yet the UK Press has much more freedom compared to the ordinary citizen. This book (published in 2007) follows on from the author's 2004 book titled Civil Liberties in England and Wales. Privacy is a contemporary topic of law and some might even say, the hottest civil liberties topic. The UK government has before Parliament The Serious Crimes Bill 2007, one part of which will attempt to establish a super police database of all UK citizens' information and another part of which will attempt to make the interrogation of business files on personnel a legal compulsion. The UK government also has The Interception Of Communication (As Evidence) Bill 2007 before parliament. It is therefore fitting that the subject of privacy is aired.

Governing Nonprofit Organizations Apr 27 2020 The nonprofit sector is a vital component of our society and is allowed the greatest freedom to operate. The public understandably assumes that since nonprofit organizations are established to do good, the people who run nonprofits are altruistic, and the laws governing nonprofits have reflected this assumption. But as Marion Fremont-Smith argues, the rules that govern how nonprofits operate are inadequate, and the regulatory mechanisms designed to enforce the rules need improvement. Despite repeated instances of negligent management, self-interest at the expense of the charity, and outright fraud, nonprofits continue to receive minimal government regulation. In this time of increased demand for corporate accountability, the need to strengthen regulation of nonprofits is obvious. Fremont-Smith addresses this need from a historical, legal, and organizational perspective. She combines summaries and analysis of the substantive legal rules governing the behavior of charitable officers, directors, and trustees with descriptions of the federal and state regulatory schemes designed to enforce these rules. Her unique and exhaustive historical survey of the law of nonprofit organizations provides a foundation for her analysis of the effectiveness of current law and proposals for its improvement.
