It includes the author's individual books on: Genethliacal Astrology Mundane Astrology Astro-Meteorology Medical Astrology Elections This classic work is filled with numerous examples and its original publication was praised in the the Spiritualist: "Even for those who desire only to obtain a general knowledge of the subject, or at most be able to cast and read an astrological figure, Mr. Pearce's book may be recommended as easily intelligible, and containing much interesting matter, besides the process that will be chiefly useful to the student whose aims are more ambitious. To the latter it is invaluable. It is enriched with many interesting notices of nativities illustrating the different rules and doctrines of the science. "

[Preaching for the Rest of Us](#) Mar 02 2020 Preaching for the Rest of Us serves as a starter's guide to text-driven preaching. Driven by the conviction that pastors hold the weighty and honorable responsibility of explaining Scripture to their congregations, Galtay and Smith present a clear step-by-step process for re-presenting Scripture in compelling text-driven sermons. This unique type of preaching is the interpretation and communication of a text of Scripture driven by the substance, structure, and spirit of the text. It's not the presentation of a sermon, but the re-presentation of a text of a Scripture. For those who don't feel trained for text-driven preaching, whose preaching template is tired and predictable, or need a preaching restart, Preaching for the Rest of Us provides a compelling reason and method for preaching texts of Scripture.

[English Text](#) Jul 18 2021 This book is a comprehensive introduction to text forming resources in English, along with practical procedures for analysing English texts and relating them to their contexts of use. It has been designed to complement functional grammars of English, building on the generation of discourse analysis inspired by Halliday and Hasan's Cohesion in English. The analyses presented were developed within three main theoretical and applied contexts: (i) educational linguistics (especially genre-based literacy programmes) (ii) critical linguistics (as manifested in the development of social semiotics) and (iii) computational linguistics (in dialogue with the various text generation projects based on systemic approaches to grammar and discourse). English Text's major contribution is to outline one way in which a rich semantically oriented functional

grammar can be systematically related to a theory of discourse semantics, including deconstruction of contextual issues (i.e. register, genre and ideology). The chapters have been organized with the needs of undergraduate students in theoretical linguistics and postgraduate students in applied linguistics in mind.

**Risky Text Book** Sep 19 2021 The Risky Text Book is a compilation of funny text messages. This book shows how awkward, vulnerable and human we all are, even in text messages. Though filled with humor, the true goal is to start conversation

Text Analysis for the Social Sciences May 16 2021 This book provides descriptions and illustrations of cutting-edge text analysis methods for communication and marketing research; cultural, historical-comparative, and event analysis; curriculum evaluation; psychological diagnosis; language development research; and for any research in which statistical inferences are drawn from samples of texts. Although the book is accessible to readers having no experience with content analysis, the text analysis expert will find substantial new material in its pages. In particular, this collection describes developments in semantic and network text analysis methodologies that heretofore have been accessible only among a smattering of methodology journals. The book's international and cross-disciplinary content illustrates the breadth of quantitative text analysis applications. These applications demonstrate the methods' utility for international research, as well as for practitioners from the fields of sociology, political science, journalism/communication, computer science, marketing, education, and English. This is an "ecumenical" collection that contains applications not only of the most recent semantic and network text analysis methods, but also of the more traditional thematic method of text analysis. In fact, it is originally with this volume that these two "relational" approaches to text analysis are defined and contrasted with more traditional "thematic" text analysis methods. The emphasis here is on application. The book's chapters provide guidance regarding the sorts of inferences that each method affords, and up-to-date descriptions of the human and technological resources required to apply the methods. Its purpose is as a resource for making quantitative text analysis methods more accessible to social science researchers.

**The Text of the Earliest New Testament Greek Manuscripts** Aug 26 2019 The manuscripts that form the Greek New Testament are scattered throughout the world and are usually only accessible to scholars and professionals. These were the manuscripts read by the earliest Christians, which comprised their "New Testament." In his volumes, Philip Wesley Comfort bridges the gap between these extant copies and today's critical text by providing accurate transcriptions of the earliest New Testament manuscripts, with photographs on the facing pages so readers can see the works for themselves. Comfort also provides an introduction to each manuscript that summarizes the content, date, current location, provenance, and other essential information, including the latest findings. This allows students and scholars to make well-informed decisions about the translation and interpretation of the New Testament. Volume 1 includes manuscripts from Papyrus 1-72. Volume 2 includes manuscripts from Papyrus 75-139 as well as from the uncials. In addition, it features a special

section on determining the date of a manuscript. This two-volume set replaces the previously published single volume *Text of the Earliest New Testament Greek Manuscripts*, as it contains many new manuscripts, updated research, and higher quality images of all manuscripts previously covered. "For nearly a generation, Philip Comfort's *The Text of the Earliest New Testament Greek Manuscripts* (Tyndale House, 2001) has been an almost indispensable tool for the many students and scholars who know biblical Greek but whose only acquaintance with the earliest Greek manuscripts is through the textual apparatus of the Nestle or UBS text. This work provides introductions to all the early papyri, plus the actual texts in readable printed Greek. Who could ask for more? Only the passage of time requires more, and Philip Comfort has now supplied it, with a very welcome update of forty-nine more papyri (published since 2001), as well as papyri and uncials of the fourth century. This is a major achievement giving more and more of us a place at the table." -- J. Ramsey Michaels, Missouri State University "As a scholar and teacher-preacher, I need to know the evidence for the dating of a particular book and the evidence for the best reading of the text. The compiled Greek New Testaments are handy, but they do not give me enough information. In these present volumes, I get what I want and need for the roughly 190 of the earliest manuscripts rather than relying on cryptic footnotes or chasing around the world to find the actual manuscripts themselves. These volumes include photographs of the manuscripts, discussion of their dating, and transcriptions of their texts. Thank you Philip Comfort and the publisher. I hope the binding is sturdy, for the books will be used." Peter H. Davids, -- Houston Graduate School of Theology "The first edition of this book filled a very important need in bringing the earliest New Testament manuscripts in a single space. This second edition only enhances the work's usefulness as it includes more than one hundred new manuscripts. The discussion of the dating of the manuscripts will be of considerable value. All those interested in New Testament textual criticism will find this as an essential tool." -- John N. Oswalt, Asbury Theological Seminary "A life's work, now available for the New Testament exegete. This great work presents clear access to the earliest New Testament Greek manuscripts. A magnum opus by Philip Comfort, these useful volumes of the papyri and uncials, provide beyond what students see in the critical apparatus of the Nestle and UBS texts. This is a must-have resource for New Testament exegesis, giving immediate access to the text of each manuscript dated from AD 100 to AD 400. It is a book every New Testament scholar will grow into, as their skills in New Testament exegesis progress. This is a great bargain." -- Jim Swanson, Tyndale House Publishers "The earliest manuscripts are a topic of reflection and debate when it comes to the New Testament text. This book gives you the latest, up close look at the first four centuries of manuscripts. This a useful study that reveals the state of the discussion about these important manuscripts." -- Darrell L. Bock, Dallas Theological Seminary "This book is an indispensable resource for all students of the New Testament, especially those engaged in New Testament textual criticism. All the features that made the first

edition an invaluable reference for the study of the Greek New Testament remain in place. The expanded edition of the volume includes the additional papyri and another fifty manuscripts dated from the fourth century AD. Kudos to the author and publisher for collecting all these New Testament Greek manuscripts in a most readable and accessible two-volume format. My high commendation for this edition of the book is only reinforced by the success of its predecessor." -- Andrew Hill, Wheaton College

**The Inside Text** May 04 2020 SMS or Text is one of the most popular forms of messaging. Yet, despite its immense popularity, SMS has remained unexamined by science. Not only that, but the commercial organisations, who have been forced to offer SMS by a demanding public, have had very little idea why it has been successful. Indeed, they have, until very recently, planned to replace SMS with other messaging services such as MMS. This book is the first to bring together scientific studies into the values that 'texting' provides, examining both cultural variation in countries as different as the Philippines and Germany, as well as the differences between SMS and other communications channels like Instant Messaging and the traditional letter. It presents usability and design research which explores how SMS will evolve and what is likely to be the pattern of person-to-person messaging in the future. In short, *The Inside Text* is a fundamental resource for anyone interested in mobile communications at the start of the 21st Century.

[Book and Text in France, 1400-1600](#) Jul 06 2020 In recent years, literary scholars have come increasingly to acknowledge that an adequate understanding of texts requires the study of books, the material objects through which the meanings of texts are constructed. Focusing on French poetry in the period 1400-1600, contributors to

this volume analyze layout, illustration, graphology, paratext, typography, anthologization, and other such elements in works by a variety of writers, among them Charles d'Orléans, Jean Bouchet, Pierre de Ronsard and Louise Labé. They demonstrate how those elements play a crucial role in shaping the relationships between authors, texts, contexts, and readers, and how these relationships change as the nature of the book evolves. An introduction to the volume outlines the methodological implications of studying the materiality of literature in this period; situates the various papers in relation to each other and to the field as a whole; and indicates possible future directions of research in the field. By engaging with issues of major current methodological concern, this volume appeals to all scholars interested in the materiality of the literary text, including the burgeoning field of text-image studies, not only in French but also in other national literatures. In addition, it enables fruitful connections to be made between late-medieval and Renaissance literature, areas still often studied in isolation from each other.

**Text in Action** Jun 28 2022 Following on from the widely acclaimed *The Actor and the Text* - which was addressed directly to the actor - *Text in Action* is drawn from Cicely's group work experiences, encompassing the viewpoint of the director as well. To begin with, the author explores language from a cultural and personal perspective. In these days of management jargon and internet technology are we losing touch with the ability to communicate fully? Is the deeper imaginative world being left unexpressed? The main body of the book contains detailed, practical exercises for actors and directors during the rehearsal process. All exercises will be tied to specific scenes, leading to a fuller exploration of the text. *Text In Action* analyses the imagery of plays, speech structures, the physicality of language and emphasises the importance of finding a collective voice. Cicely's guidance on the matter of voice will help actors find relationships and situations through the text in a unique way, in order to make it more dynamic and creative.

**The Laṅkāvatāra Sūtra** Jun 24 2019 Description: The Lankavatara Sutra reflects those fundamental themes of Buddhism which the Mahayana in general cherishes and upholds. It looks at existence from the absolute and relative realms, and thinks that suffering will be experienced so long as one confines oneself to the realm of the relative. Since the relative cannot be ultimately real, it has to be seen as nothing more than a projection of the mind. As to how to realize the ultimate truth of unity the text resorts to general Mahayana theory of Buddhology in which the Buddha is seen as the ultimate ontological principle. In order to realize unity with this ontic principle, we have to make use of such methods which, though relative, terminate in the realization of Enlightenment. These methods are spoken of as Skillful Means. As a spiritual manual, the text points out as to how the Bodhisattvas, on account of their unlimited compassion for sentient beings, work for the salvation of all. While delineating on the theme of Bodhisattvas, the text thereby speaks about the ten vows of a Bodhisattva. It is in incarnating these vows within that a real turn-about or spiritual transformation occurs, and thereby are uprooted the roots of ignorance. The text, thus, offers a spiritual banquet to those who want to taste the bliss eternal.
