Accessibility and Acceptability in Technical Manuals Aug 26 2019 Accessibility and Acceptability in Technical Manuals is written for an audience with a general interest in readability studies, linguistics and technical writing. With the main emphasis on technical manuals the book is primarily targeted at those who have a special interest in the design and use of utility texts and how these texts are received and understood by a multifaceted audience. Accessibility is not a new research area and many explanations have been offered over the past years as to why non-experts often have difficulties in comprehending texts written by technological experts. This book offers a new approach to accessibility studies by exploring not only style, but also attitudes to style, by asking text consumers which style they prefer for different parts of the manual. A key role is played by the Systemic Functional Linguistics' notion of grammatical metaphor, a stylistic choice that is commonly used in technical literature. Grammatical metaphor – although apparently obstructing the comprehension process of some readers – is a common element in the preferred style that separates the 'insiders' from the 'outsiders'. An explanation of this rather surprising result is offered by resorting to Critical Discourse Analysis.

Electrical and Electronic Systems Tasksheet Manual for NATEF Proficiency Apr 26 2022 For sales or pricing inquiries outside of the United States, please visit: <http://www.cdxauto.com/ContactUs> to access a list of international CDX Automotive Account Managers. Electrical and Electronic Systems Tasksheet Manual for NATEF Proficiency is designed to guide automotive students through the tasks necessary to meet National Automotive Technicians Education Foundation (NATEF) requirements for National Institute for Automotive Service Excellence (ASE) Standard 6: Electrical and Electronic Systems. Organized by ASE topic area, companion tasks are grouped together for more efficient completion, and are clearly labeled with CDX and NATEF task numbers and the NATEF priority level to help students easily manage responsibilities. This manual will assist students in demonstrating hands-on performance of the skills necessary for initial training in the automotive specialty area of electrical and electronic systems. It can also serve as a personal portfolio of documented experience for prospective employment. Used in conjunction with CDX Automotive, students will demonstrate proficiency in electrical/electronic fundamentals, diagnosis, service, and repair.
