Rats and Gargoyles Jan 30

2020 It is a nameless city somewhere between past and future, a mythic realm at the "heart of the world," where wicked Rat Lords have reduced all humankind to slaves, and god-daemons make the decision to end all existence.

This energizes a compelling quest for survival, and prompts the powerful White Crow to order an uprising against this chaotic strike that threatens them all. Among those who respond to her are the defiant Prince Lucas of Candover, a student at the University of Crime, and no mans's slave; and Zari, the young Katayan woman who is destined to become the living Memory of all that follows. And others rally to join them in one final desperate revolt, hoping to create a magic powerful enough to reshape the very nature of how they live.

This collection of essays displays the talent and insight that make the Panshins the obvious and worthy successors to Damon Knight and James Blish in the field of science fiction and fantasy criticism. The Panshins document the evolution of a new and fruitful paradigm and offer a challenge to all conventional opinion about science fiction. They demonstrate that the conception of science fiction as fiction about science was fatally compromised from the outset. They trace the continuity of science fiction with man's most ancient and meaningful stories, the great fantasy of the past, and find this continuity in symbols of transcendent mystery. Nearly half of this book is devoted to studying the works of Robert Heinlein, extending and reconsidering the analysis begun in Heinlein in Dimension, and concluding

with a long discussion of "The Number of the Beast--." The Panshin team applies theories of human psychological development to show the deeper meanings of the stories of Heinlein and other authors. They say: "In the mirror of a science fiction story may be seen a reflection of the author. In the mirror of science fiction stories may be seen a reflection of an era. And in our reading of science fiction--the stories we choose and what we make of them--may be seen a reflection of ourselves. We read science fiction to know ourselves better."

What Mad Universe Dec 11 2020

Pulp SF magazine editor Keith Winton was answering a letter from a teenage fan when the first moon rocket fell back to Earth and blew him away. But where to? Greenville, New York, looked the same, but Bems (Bug-Eyed Monsters) just like the ones on the cover of Startling Stories walked the streets without attracting undue comment. And when he brought out a half-dollar coin in a drugstore, the cops wanted to shoot him on sight as an Arcturian spy. Wait a minute. Seven-foot purple moon-monsters? Earth at war with Arcturus? General Dwight D. Eisenhower in command of Venus Sector? What mad universe was this? One thing was for sure: Keith Winton had to find out fast - or he'd be good and dead, in this universe or any other.

Black Unicorn Jun 16 2021

Nobody knew where it had come from, or what it wanted. Not even Jaive, the sorceress, could fathom the mystery of the fabled beast. But Tanaquil, Jaive's completely unmagical daughter, understood it at once. She knew why the unicorn was there: It had come for her. It needed her. Tanaquil was amazed because she was the girl with no talent for magic. She could only fiddle with broken bits of machinery and make them work again. What could she do for a unicorn? Grades 7-12, Tanaquil may be the daughter of a sorceress, but she can't do any magic--or so she thinks--and she finds life in her mother's

castle very dull and lonely. Her one skill, that of mending things, leads her to piece together a pile of old bones found in the desert and unknowingly bring back to life a black unicorn that needs Tanaquil to help it return to its own, more perfect world. In the process of doing this, Tanaquil finds a sister, and discovers what her own powers really are. The plot of The Black Unicorn is in no way as simple as this description. It is complex and twisting, and while readers may not be sure where they're going, they'll never be bored. Lee's lush and highly visual style and her down-to-earth sense of humor are a constant entertainment. Her imagination is boundless, whether in recreating the life of desert nomads or describing a castle full of magical devices all gone slightly awry. The static cover illustration, with rearing unicorn and silver-gowned heroine, does not begin to convey the special flavor of this stylish, humorous fantasy. --Ruth S. When the warrior Wanbli came of age, he cast his lot among the stars and left the world where he'd been born. Left it, he thought, forever. And, finally, it brought him to the colony ship Commitment. There, Wanbli learned the true purpose of his life—a mission so vital that it required risking the lives of everyone on the ship and the future of his home world. His mission meant returning to that world, but only if he could survive the deadly machinations of those who sought to stop him.

Some of My Best Friends Are Human Sep 07 2020 In an underground orphan center on an overpopulated planet, Tajen Jesmuhr dreams of freedom in

a distant wilderness under an open sky. So when offered an interplanetary ecology class with offworld field trips, Taje leaps at the chance. But Taje isn't the only misfit here, where everyone has a tragic past and hidden wounds, and she soon clashes with her teacher and her classmates, including: A boy with a frightening secret who lost his family to a terrorist plague. A crafty female human-alien chimera whose parents disappeared in a paraspace accident. And a boy with a hidden past and a dead father he still hates. All may have promising careers ahead of them, but only if they can learn to trust themselves and one another enough to survive an uncaring system and a deadly final exam. Slow River Jul 18 2021 Nicola Griffith, winner of the Tiptree Award and the Lambda Award for her widely acclaimed first novel Ammonite, now turns her attention closer to the present in Slow River, the dark and intensely involving story of a young woman's struggle for survival and independence on the gritty underside of a near-future Europe. She awoke in an alley to the splash of rain. She

was naked, a foot-long gash in her back was still bleeding, and her identity implant was gone. Lore Van de Oest was the daughter of one of the world's most powerful families...and now she was nobody. Then out of the rain walked Spanner, an expert data pirate who took her in, cared for her wounds, and gave her the freedom to reinvent herself again and again. No one could find Lore if she didn't want to be found: not the police, not her family, and not the kidnappers who had left her in that alley to die. She had escaped...but she paid for her newfound freedom in crime, deception, and degradation--over and over again. Lore had a choice: She could stay in the shadows, stay with Spanner...and risk losing herself forever. Or she could leave Spanner and find herself again by becoming someone else: stealing the identity implant of a dead woman, taking over her life, and inventing her future. But to start again, Lore required Spanner's talents--Spanner, who needed her and

and who always had a price. And even as Lore agreed to play Spanner's games one final time, she found that there was still the price of being a Van de Oest to be paid. Only by confronting her past, her family, and her own demons could Lore meld together who she had once been, who she had become, and the person she intended to be.... In *Slow River*, Nicola Griffith skillfully takes us deep into the mind and heart of her complex protagonist, where the past must be reconciled with the present if the future is ever to offer solid ground. *Slow River* poses a question we all hope never to need to answer: Who are you when you have nothing left?

Rite of Passage Oct 01 2022 "In 2198, one hundred and fifty years after the desperate wars that destroyed an overpopulated Earth, Man lives precariously on a hundred hastily-established colony worlds and in the seven giant Ships that once ferried men to the stars. Mia Haverro's Ship is a small closed society. It tests

its children by casting them out to live or die in a month of Trial in the hostile wilds of a colony world. Mia Haverro's Trial is fast approaching and in the meantime she must learn not only the skills that will keep her alive but the deeper courage to face herself and her world. Published originally in 1968, Alexei Panshin's Nebula Award-winning classic has lost none of its relevance, with its keen exploration of societal stagnation and the resilience of youth." --Amazon.com.

Future Females Jan 12 2021 "A justification for paying serious attention to science fiction may by now be necessary only for other literary critics and scholars. Still, the question of why a book addressing itself to science fiction has to be faced briefly." This comment, the opening statement of Darko Suvin's recent book, is of concern to Professor Barr, editor of this volume, since *Future Females* is addressing itself to women in science fiction. Metaphorically speaking, if the mere mention of the genre causes ~~an unwilling~~

of academic feathers, then, relating to women is analogous to placing all those simply ruffled feathers in front of a wind machine. Everyone will not welcome a volume where science fiction is viewed in terms of women, but Professor Barr felt such a volume is needed. As Roger Schlobin's bibliography indicates, women are certainly contributing continuously to the science fiction field. This collection of essays illuminates some of this fiction.

Stand on Zanzibar May 28 2022 The brilliant 1969 Hugo Award-winning novel from John Brunner, *Stand on Zanzibar*, now included with a foreword by Bruce Sterling Norman Niblock House is a rising executive at General Technics, one of a few all-powerful corporations. His work is leading General Technics to the forefront of global domination, both in the

marketplace and politically--- it's about to take over a country in Africa. Donald Hogan is his roommate, a seemingly sheepish bookworm. But Hogan is a spy, and he's about to discover a breakthrough in genetic engineering that will change the world...and kill him. These two men's lives weave through one of science fiction's most praised novels. Written in a way that echoes John Dos Passos' U.S.A. Trilogy, *Stand on Zanzibar* is a cross-section of a world overpopulated by the billions. Where society is squeezed into hive-living madness by god-like mega computers, mass-marketed psychedelic drugs, and mundane uses of genetic engineering. Though written in 1968, it speaks of now, and is frighteningly prescient and intensely powerful. Heinlein in Dimension Jul 30 2022 With an introduction by James Blish. From the early 1940s until his death in 1988, Robert A. Heinlein reigned unchallenged as the most influential contemporary author of science fiction. His first few stories turned the field upside down, and set new standards of narrative and scientific excellence. He was justly credited with introducing narrative techniques which are now taken for granted.

were revolutionary at the time. This book was the first full-length critical analysis of Heinlein's work and his place in modern science fiction. Like Damon Knight, Mr. Panshin works on the assumption that the ordinary standards of literature apply with full force to science fiction; a vaulting imagination does not excuse bad writing or foolish plotting. In addition there are criteria of narrative technique and scientific plausibility that are peculiar to science fiction. Rigorously applying these standards, Mr. Panshin discusses Heinlein's fiction and analyzes its strengths and weaknesses; he traces the constants and the variables in Heinlein's interests and viewpoints; and he offers a suggestion as to the ultimate significance of Heinlein both in science fiction and in literature as a whole. Neither adulatory nor carping, this is a study in depth which is both readable and comprehensive. With bibliographies of Heinlein's works up to 1968. Also note that there are some copies left

arrives on the human colony of Astrobe in the year 2535 A.D., where there is trouble in utopia: can he and his motley followers save this golden world from the Programmed Persons, and the soulless perfection they have engineered? The survival of faith itself is at stake in this thrilling, uncategorizable, wildly inventive first novel--but the adventure is more than one of ideas. As astonishingly as Philip K. Dick and other visionaries of the 1960s new wave, Lafferty turns the conventions of space-opera science fiction upside-down and inside-out. Here are fractured allegories, tales-within-tales, twinkle-in-the-eye surprises, fantastic byways, and alien subjectivities that take one's breath away. Neil Gaiman has described Lafferty "a genius, an oddball, a madman"; Gene Wolfe calls him "our most original writer." Fifteen-year-old Johnny Gibbs does, well in school, respects his teachers, and loves his family. Then suddenly, with a few short words, his idyllic life is shattered. He learns that the family he has loved all his life is not his own, but a foster family. And now he is being sent to live with someone else. Shocked by the news, Johnny does the only thing he can think of: he runs. Leaving his childhood behind forever, Johnny takes to the streets where he learns about living life--the hard way. Richard Wright, internationally acclaimed author of *Black Boy* and *Native Son*, gives us a coming-of-age story as compelling today as when it was first written, over fifty years ago. 'Johnny Gibbs arrives home jubilantly one day with his straight 'A' report card to find his belongings packed and his mother and

distraught. Devastated when they tell him that he is not their blood relative and that he is being sent to a new foster home, he runs away. His secure world quickly shatters into a nightmare of subways, dark alleys, theft and street warfare. . . . Striking characters, vivid dialogue, dramatic descriptions, and enduring themes introduce a new generation of readers to Wright's powerful voice.'—SLJ.
