Surgical Technology for the Surgical Technologist Aug 21 2021 Surgical technology educators and students previously had no choice but to rely on textbooks written for OR nurses that often contained too little information on the role of the surgical technologist and not enough of the subtle observations and nuances that come from years in the field. Until now, Surgical Technology for the Surgical Technologist is the first text for surgical technology students and faculty that is precise, focused and helpful. Information is presented in a thorough and consistent manner that encourages student learning of both the information and the process. The writers' 50 years of expertise in the field give Surgical Technology for the Surgical Technologist a depth not found in other texts.(KEYWORDS: Surgical Technology, technologist, OR, Nurses, operating)

Technopoly Dec 13 2020 In this witty, often terrifying work of cultural criticism, the author of Amusing Ourselves to Death chronicles our transformation into a Technopoly: a society that no longer merely uses technology as a support system but instead is shaped by it—with radical consequences for the meanings of politics, art, education, intelligence, and truth.

We Want to Do More Than Survive May 06 2020 Winner of the 2020 Society of Professors of Education Outstanding Book Award Drawing on personal stories, research, and historical events, an esteemed educator offers a vision of educational justice inspired by the rebellious spirit and methods of abolitionists. Drawing on her life's work of teaching and researching in urban schools, Bettina Love persuasively argues that educators must teach students about racial violence, oppression, and how to make sustainable change in their communities through radical civic initiatives and movements. She argues that the US educational system is maintained by and profits from the suffering of children of color. Instead of trying to repair a flawed system, educational reformers offer survival tactics in the forms of test-taking skills, acronyms, grit labs, and character education, which Love calls the educational survival complex. To dismantle the educational survival complex and to achieve educational freedom—not merely reform—teachers, parents, and community leaders must approach education with the imagination, determination, boldness, and urgency of an abolitionist. Following in the tradition of activists like Ella Baker, Bayard Rustin, and Fannie Lou Hamer, *We Want to Do More Than Survive* introduces an alternative to traditional modes of educational reform and expands our ideas of civic engagement and intersectional justice.
